IRD Billing - User Manual

Setup, daily work, CBMS sync and month end

Edition: 29 September 2026

Contents

1. What IRD billing means in this software
2. One-time setup
3. Daily work
4. IRD Compliance screen (Tools > IRD Compliance / CBMS)
5. Month end
6. Questions

1. What IRD billing means in this software

When **IRD Billing** is turned on (Setup > System Control), sales bills and sales returns follow the Inland Revenue Department rules:

- a posted bill cannot be changed or deleted - only **cancelled** (with a reason);
- every bill and return is kept in the **IRD register** (Materialized View);
- the first print is the original; every later print says **COPY OF ORIGINAL (n)**;
- bills and returns can be sent to IRD's **CBMS** automatically;
- every posting, cancellation and print is written to the **IRD Audit Log**.

2. One-time setup

1. Setup > System Control

- turn on *IRD Billing*;
- set the *VAT Ledger* (VAT payable).

2. Setup > Document Numbering

- give Sales Bill and Sales Return their number series (per fiscal year).

3. Tools > IRD Compliance / CBMS > Settings

- *Enable CBMS sync*;
- *CBMS API base URL* (leave the default unless IRD gives another);
- *Username, Password* and *Seller PAN*, as registered with IRD;
- *Realtime* on;
- *Push automatically when a bill / return is posted* on;
- *Max attempts* (e.g. 5): how many times a failed document is retried automatically.

4. Post one test bill and check that it appears in **Materialized View** and shows *success* in **CBMS Sync**.

3. Daily work

Making a bill

1. Data Entry > Sales Transaction > **Sales Bill / Invoice**.
2. Choose Cash / Credit, Customer (PAN is taken from the customer), items, qty, rate, discount, VAT.
3. **Save**. The bill is posted: accounts, stock, the IRD register and (if on) CBMS all update.
4. **Print**. The first print is the original.

When a bill is wrong

- You cannot modify or remove a posted bill.
- Open it from the list and use **Cancel** (Document Actions), and write the reason.
 - The bill stays in the register as *inactive*.
 - Its accounts and stock are reversed.
 - CBMS gets the cancellation status.
- Make a new, correct bill.

Goods coming back

- Use **Sales Return** (credit note) against the original bill.
- Give the *Return Reason*.
- It is sent to CBMS as a bill return, with the original bill number.

Printing again

- Print the bill again from the list. It shows **COPY OF ORIGINAL (n)** automatically.
- The number of prints is in the Materialized View.

4. IRD Compliance screen (Tools > IRD Compliance / CBMS)

Tab	What you see / do
Materialized View	Every bill and return with IRD's columns (fiscal year, bill no, customer, PAN, date BS, amount, discount, taxable, non-taxable, VAT, total, synced, printed, print count, active, entered by, printed by / time). Filter by date, document type, sync status, active. Export to Excel.
Sales Book	Annex 13 style: date, bill no, buyer, PAN, total, non-taxable, export, taxable, VAT - for the VAT return.
CBMS Sync	The queue: pending / success / failed / skipped, attempts, IRD's response. Sync pending sends all waiting documents; Retry sends one again.
Audit Log	Who posted, cancelled or printed which bill and when; blocked attempts to edit or delete.
Settings	CBMS credentials and options (see Setup).

CBMS responses

Code	Meaning	What to do
200	Saved at IRD	Nothing
101	Bill already exists at IRD	Nothing - counted as synced
100	Username / password / PAN do not match	Correct Settings, then Retry
102 / 103	Error at IRD	Retry later
104	Data invalid (e.g. missing PAN format)	Correct the customer PAN / bill, then Retry
105	Return of a bill IRD does not know	Sync the original bill first, then Retry the return
NET	No connection	Retry when online

5. Month end

1. **CBMS Sync**: no failed documents (fix and Retry).
2. **Accounts Report > VAT, TDS & IRD > VAT Return**: output VAT, input VAT, payable / credit carried forward.
3. **Reconciliation (VAT)**: *Tallied* - the VAT register agrees with the VAT ledger.
4. **IRD Sales Book** and **Annex 13**: export for filing.
5. When the year is closed (Setup > Fiscal Years > Close), nothing dated in that year can be posted or cancelled any more.

6. Questions

- **Why can I not edit a posted bill?** IRD rules - cancel it and issue a new one.
- **Why is my bill not in the Materialized View?** Only posted bills and returns are in it; a draft is not.
- **The internet was down when I posted.** The bill is posted normally and waits in CBMS Sync; it is sent on the next automatic attempt or when you press *Sync pending*.
- **Who can cancel?** Users whose Security Group allows cancelling sales documents; every cancellation is in the Audit Log.
