

Bill-wise Ageing

Menu: Accounts Report · **Type:** report

Each open bill with its age and due status.

How to use

1. Choose party / as-on date.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
From Date	First date of the report period.
To Date	Last date of the report period.
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Tips

- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns, Σ Values; Columns = Field Selector), totals per column (Σ Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
