

Sites / Contracts

Menu: Construction · **Type:** master

Contract sites (own and petti thekka taken) with BOQ, running bills to the client, material issued, wages, sub-contracts given and other cost.

How to use

1. New site: client, contract value, cost center.
2. BOQ items.
3. RA (running) bill: work done, VAT, retention, TDS, advance recovery - posted to the GL.
4. Material: from store or straight from a purchase bill.
5. Wages sheets, sub-contract bills.

Effect

Where	What happens
Accounts	RA bill: Dr client (and retention / TDS / advance) / Cr contract income / Cr VAT.
Stock	Material issued to the site goes out of the store (consumption with the site cost center).
VAT	RA bill VAT is output VAT.
Other modules	Site profit = billed + other income - (material + wages + sub-contract + other cost).
