

Daily Register (one-page day sheet)

Menu: Accounts Report · **Type:** report

The counter's paper day sheet filled from posted vouchers: Sales (cash A / credit B), Purchase (C / D), Received / Bank withdraw (E / F), Expenses / Bank deposit (G / H), Return / Exchange (I / J), cash summary, sales / purchase to date, stock and profit.

How to use

1. Choose the date (or a date range), optionally a user or salesman / agent.
2. Cash summary: opening cash + A + E - C - G - refunds = expected closing; the books' closing and the difference (other cash entries such as JV).
3. Sales / purchase: opening from the fiscal year start to the day before, today, less return, to date; opening / closing stock, gross and net profit of the day.
4. Cash detail: count the notes (1000 ... 5, coin) - the difference with the books is shown; write the day's note. Count and note are kept on this computer per date.
5. With a user / agent filter only their vouchers are listed; opening / closing cash, stock and profit are left out. Print for signature.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
To	Last date of the report period.

Tips

- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns, Σ Values; Columns = Field Selector), totals per column (Σ Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
