

Reconciliation (VAT / Sales / Purchase / Stock / TDS)

Menu: Accounts Report · **Type:** report

Do the registers and the books agree? Document by document: VAT register vs VAT ledgers, sales register (incl. JV sales, credit notes) vs sales accounts, purchase register (incl. additional bills, JV purchases, debit notes) vs purchase accounts, purchase value vs value put into stock, TDS vs TDS ledgers.

How to use

1. Overview: Tallied / Not tallied for each check.
2. Open a tab; click Differences / Only in register / Only in books to see why.
3. Add or remove accounts compared with the chips.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Show	Which rows to show (all / only differences / ...).

Tips

- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns, Σ Values; Columns = Field Selector), totals per column (Σ Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
