

Purchase Additional Expense

Menu: Purchase · **Type:** entry

Freight, customs, clearing, insurance, labour ... on purchased goods - taxable or non-taxable bills of other parties, or no bill - allocated to the goods (landed cost).

How to use

1. Ref. Bill No. (required): the posted purchase bill the cost belongs to - only the bill is linked (not the order / GRN); its vendor comes in as the vendor (change it when another party is paid). Older entries linked to an Order / GRN are shown as "Linked (older entry)".
2. Product-wise Terms tab: the products of the linked document; Terms... on a product opens its terms (Billing Terms marked Purchase Additional + Product Wise) - rate % of that product's value or amount; the whole amount goes to that product's cost.
3. Bill-wise Terms tab: a fixed form with one row per bill-level term - fill the amounts that apply; each is divided over the products by the term's basis (value / qty, changeable per row). Empty rows are left out.
4. A term's ledger is fixed by the term - only its sub-ledger can be changed. "Paid to" (the counter ledger) and its sub-ledger are free; empty = the entry's vendor. One row per term: Paid to, Supplier Bill No, Bill Date, VAT % / VAT. The bill type is not chosen - VAT on the row = taxable bill, a bill no without VAT = tax-free bill, neither = no bill. Rows of one party with the same bill no are one bill (taxable + tax-free parts), credited to that party; several bills of several parties fit in one entry.
5. The header shows the vendor of the Ref. Bill (read only) - there is no cash / credit choice: each line and customs row has its own Credit A/c (vendor, cash, bank, customs agent or any balance-sheet ledger; empty = the Ref. Bill vendor). The basis of a term comes from Billing Terms; the term ledger's Sub-Ledger is picked on the line.
6. Customs (Bhansar) tab - for the VAT report only, no ledger posting (customs duty / VAT are posted by the Bill-wise or Product-wise terms): one row per Pragyaan Patra - date, Customs Office (from the Customs Offices master), Bill-wise or Item-wise; Assessable, Taxable, Tax-free values, VAT % and VAT (item-wise: per product of the Ref. Bill, summed on the row). The Purchase VAT register lists it as an Import purchase, with the items when item-wise.
7. Credit A/c and Credit Sub-Ledger on every line (empty = the Ref. Bill vendor and its sub-ledger).
8. Below: Goods Details (products of the Ref. Bill with additional, net amount, cost / unit), Party Bills / VAT (per party and bill: taxable, VAT, tax-free, less TDS, credited to the party) and Account Posting (the ledger entry that will be posted, Dr = Cr); the Totals panel shows the Net Payable, checked against the party credit of the posting.
9. Add / Refresh TDS: one TDS line per party paid - base = that party's "+" lines (only the lines whose term is marked TDS Applicable, when any is), rate from System Control (default 1.5 %). TDS is a non-additional term (not in the stock cost).
10. Totals: Prd. Additional / Non-Additional (product-wise terms), Gen. Additional / Non-Additional (bill-wise terms), Net Additional (goes to the stock cost), Net Non-Additional (VAT claimable, TDS, terms not in costing), Total and Net Total.
11. Check the per-product preview (additional, cost / unit), then Save and post.

Effect

Where	What happens
Accounts	Dr each term / expense ledger with its sub-ledger (Cr for "-" terms) / Dr VAT (claimable) / Cr the party of each line with its sub-ledger. TDS lines: Cr TDS payable.
Stock	Posted: the allocated amount is added to the cost of the stock receipt of each linked line (landed cost); cancelled: taken out again. Terms not "Include In Costing" stay out of the stock cost.

Where	What happens
VAT	Taxable / tax-free bills go to the Purchase VAT register as "Purchase Additional Bill"; Customs rows (VAT report only) as "Purchase Additional Bill (Import / Customs)" with import taxable and, item-wise, the products.
Other modules	Purchase Account and Purchase vs Stock reconciliation show it separately; TDS register; bills can later be taken in a TDS journal.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Account Posting	Yes: the expense is posted to the ledgers. No: only the landed cost moves (e.g. already booked elsewhere).
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
