

Aakash Business ERP

User Manual (complete)

Every menu and every screen - how to use it and its effect on accounts, stock and VAT

Edition: 29 September 2026

Contents

1. Getting started
 2. Master Data menu
 3. Data Entry menu
 4. Accounts Report menu
 5. Sales/Purchase menu (reports)
 6. Analysis menu
 7. Setup menu
 8. Tools and Office menus
 9. How the numbers fit together
- Screen reference

This manual explains every menu: what it is for, how to use it, and what it does to your **accounts** (ledgers, Trial Balance, P&L, Balance Sheet) and your **inventory** (stock quantity and value).

The effect of each transaction is shown in a box like this:

Accounts: what is debited and credited. **Stock:** what goes in or out.

Help inside the system

- Every screen: **? Help** on the title bar (or Shift+F1) - what the screen is for, how to use it, its effect on accounts, stock and VAT, and every field on it.
- Every field caption with a dotted underline shows its help when you point at it.
- **Tools > Help Center:** this manual, a manual for each Business Nature, the IRD Billing architecture and user manual (everyone); the Developer Guide and the PDF of every menu screen (super admin).

1. Getting started

1.1 Logging in and the screen

- Log in with your company code, user name and password.
- The top menu bar has **Master Data, Data Entry, Accounts Report, Sales/Purchase, Analysis, Setup, Office, Tools. Poultry, Construction and Automobile** appear only when that Business Nature is turned on in System Control.
- Menus open to the side (fly-out). A thin line separates groups of options.
- Press **Enter** to move to the next field. In a grid, Enter moves to the next cell and then to a new line.
- Every report table has an Excel-style filter on each column heading.

1.2 First-time setup order

1. **Setup > System Control:** Business Nature, default ledgers, VAT, stock method, dual unit, approvals.
2. **Setup > Fiscal Years, Branches & Warehouses, Document Numbering, Currencies.**
3. **Master Data > Chart of Accounts:** groups and ledgers (customers, suppliers, banks, expenses).
4. **Master Data > Billing Terms** (VAT, discount, freight ...).
5. **Master Data > Product Units, Product Groups, Categories, Product Master.**
6. **Ledger Opening Balance and Product Opening Stock.**
7. **Setup > Users, Security Groups, Data Access.**

1.3 Buttons on every transaction screen

Button	What it does	Effect
Create / Save	Saves the entry. If the module does not need approval, it is posted at once.	Accounts and stock are updated immediately
Save as Draft	Keeps what you typed as a temporary draft (no number).	None
Modify	A draft opens for editing. A posted entry is first reversed and reopened as a draft with the same number; change it and save again.	Old effect removed, new effect posted on save
Remove	Deletes a draft.	None
Cancel	Cancels a posted entry (a reason is required). The entry stays in the list as Cancelled.	All its effects are reversed

Button	What it does	Effect
Reverse	Shown instead of Cancel on Sales Bill and Sales Return when Computerized Billing (IRD) is on. The bill is reversed by a return, as IRD requires.	Reversed through the return
Print	Prints with the design from Document Designer.	None

Fill bar (one line at the top of every entry: the actions above, then **Template**):

- **Fill from Template:** fill from a saved template.
- **Fill from Previous Entry:** copy an earlier entry with a new number and today's date.
- **Open a Draft:** open a saved draft. When you save it as a real entry, the draft is deleted automatically.
- **Save as Template:** store the current entry as a template, for yourself only or for everyone.

Window title bar: Back, Refresh, Print, Dashboard, Report Center, **Related** (other screens of the same menu group), **Reports** and **? Help** sit on the screen's title bar, so the form starts right below it. On a phone the title bar keeps Back, Refresh, Related, Reports and Help as icons; forms become one column and the fill bar scrolls sideways.

Approval: when a module is ticked under System Control > Approval Needed For, Save keeps the entry as **Awaiting approval** with no effect. Only a user whose Security Group has the approval right for that document can approve it. Approving posts it, and only then do accounts and stock move.

1.4 Common parts of a sales or purchase entry

- **Master part** (top): date (BS/AD), document number (automatic or manual, following Document Numbering), Cash/Credit, party, currency and exchange rate, sales rate type (Sr1-Sr5), agent, warehouse, and the source documents to pull from.
- **Item Code cell:** type a code, short name or barcode. In POS mode, scanning a barcode adds the item straight away.
- **Grid:** qty (and alternate unit for dual-unit items), free qty, rate, **Gross, Add / Less, Net Amount**. When System Control shows item charges for the entry, Add / Less is a button: it opens the line's Item Charges pop-up (discount, tax, excise ...) and shows the pop-up's total. When item charges are off, Add / Less only shows the amount (the product's term values still count). You may type the gross or net amount; the rate (or the qty, when the product allows it) is worked out for you.
- **Product-wise term popup:** discount, excise and similar terms for one line. You may type %, rate x qty or amount, depending on the term; the other values are worked out.
- **Overall term popup:** bill-level terms (VAT, freight, bill discount, rounding off). Amounts are split over the lines by value or quantity. The Local Amount shows the value in NPR when a foreign currency is used.
- **Footer tabs:** accounts, party address/PAN (with an option to update the master), remarks, and the total in words.

2. Master Data menu

2.1 Accounts Masters

Chart of Accounts (Ledger)

- Create account groups and ledgers. The group decides where a ledger appears in the Balance Sheet or P&L.
- The ledger code is automatic (customer, supplier or both).
- Options on a ledger: credit limit and credit days, bill-wise tracking, interest %, PAN, address, area, route, agent, default sub-ledger.

Accounts: only the structure; no entry.

Sub Ledgers

- A second level under a ledger, e.g. employees under Salary, or vehicles under Fuel. Reports can show balances per sub-ledger.

Cost & Profit Centers

- Departments, projects or units to which income and expense lines can be tagged. They are used in P&L by Cost Center, Cost Center Statement and Budget reports.

Billing Terms

- Define terms used in bills:
 - **Type:** Normal, VAT or Excise.
 - **Sign:** add or deduct.
 - **Basis:** value or quantity.
 - **Calculation:** percentage, fixed rate, or formula, with an optional cap.
 - **Order** of calculation.
 - **Ledger** and sub-ledgers: Billing Ledger + Billing Sub-Ledger, Return Ledger + Return Sub-Ledger, Expiry Return Ledger + Expiry Return Sub-Ledger.
 - **Category:** e.g. Rounded Off, which rounds the bill and posts the difference.
 - **Entry input:** which of %, rate and amount the user may type.
 - **Manual override:** whether the value can be changed in the entry.
 - **Show in summary.**
 - **Term Used For:** *Transaction term* (Sales / Purchase / Production Entry - charged on the bill itself) or *Additional term* (Purchase Additional / Sales Additional - a later bill such as freight, customs, insurance).
 - **Effect:** **Include In Costing** (the amount goes into the cost of the goods / landed cost; off = an expense only) and **Include In Profitability** (counted in the profitability reports).
 - **Product Wise:** entered per product in a pop-up; otherwise bill-wise, divided over the products by the Basis.

Accounts: each term amount posts to the term's ledger when a bill is posted (VAT to the VAT ledger).

Remarks & Terms

- Standard remark texts and terms and conditions printed on documents.

Fixed Assets

- The asset register: cost, date put to use, method (straight line or written down value), rate, asset / accumulated depreciation / expense ledgers.

Accounts: none until depreciation is posted (see 3.1).

Ledger Opening Balance

- Enter each ledger's opening Dr/Cr for the first fiscal year. For bill-wise parties, enter the open bills.

Accounts: sets the opening balance used by every report.

2.2 Product Masters

Product Master

- Code, short name, barcode, group, category, company, units (base, alternate, and dual unit with conversion factor).
- **Rate basis** for fixed dual items: any, primary or secondary unit.
- Sales rates Sr1-Sr5, purchase rate, MRP.
- VAT or non-VAT, excise.
- Sales / purchase / return / non-saleable return accounts, each with its own sub-ledger (e.g. Sales Return Account + Sales Return Sub-Ledger).
- Product-wise term values.
- Flags "qty from amount" for sales and for purchase.
- Batch/serial, expiry, re-order level, fixed-asset item.

Accounts: decides which sales/purchase ledger a line posts to. **Stock:** decides the unit conversion.

Product Units

- Units such as PCS, CRT or KG, used in the unit conversions of each product.

Product Groups

- Group products for reports and data access (with extra details such as parent group and short name).

Categories

- Another way to classify products (brand, type) for reports and pricing.

Product Opening Stock

- Qty, rate and warehouse (batch/serial) on hand at the start.

Stock: stock in, on the day before the first fiscal year. **Accounts:** none; the value appears as opening stock in the statements.

BOM Template

- Bill of materials: the raw materials and quantities that make one unit of a finished product, with by-products. Used by Production Order.

2.3 Rate & Discount

Menu	Use
Multiple Rate Types (Sr1-Sr5)	Name the five sales rate columns (e.g. Wholesale, Retail, Dealer).
Rate Category	Give a customer category its own rate type or rate list.
Discount Category	Default discount % by customer category and product group.
Product Rate Change	Change the rates of many products at once, from a date.
Offer Rate	Scheme or offer rate for a period (date range), picked automatically in sales.

Accounts / Stock: none. They only fill rates in entries.

2.4 Sales Force & Routes

Menu	Use
Salesman / Agent	Salesmen and agents with commission %, area, targets and mobile login.
Route Sequencing	The order in which customers are visited on each route.
Route Plan & Mobile Login	Which route a salesman visits on which date; login for the Salesman Mobile App.
Transport Master	Transporters and vehicles printed on challans and bills.

2.5 Poultry Masters (Poultry only)

- Sheds and hatchers, poultry items (chick, feed, medicine, vaccine), breed standards, and poultry settings (ledgers and warehouse used by poultry postings).

3. Data Entry menu

3.1 Accounts

Journal Voucher

- Top: Voucher No. (from Document Numbering), Date, **JV Type**, Ref Doc No / Date, Memo Only, Cost Center, Unit.
- **Dates** can be English (AD) or Nepali (BS): the **AD / BS** button switches. In BS you type the date (2083-06-01 or 2083.6.1) or pick it from the Nepali calendar (); the other calendar's date shows beside it. The choice is remembered on your computer.
- **JV Type** decides which options show:

JV Type	Options	Voucher lines made for you
Normal Journal	none	you type the lines
Taxable / Non-taxable Purchase	supplier, PAN, bill no / date, taxable, non-taxable, VAT, purchase / expense A/c, TDS	Dr purchase, Dr VAT, Cr supplier (less TDS), Cr TDS payable
Taxable / Non-taxable Sales	customer, invoice no, amounts, VAT, sales A/c, TDS	Dr customer (less TDS), Dr TDS receivable, Cr sales, Cr VAT
Asset Purchase / Asset Sales	as above, with a Fixed Asset A/c (sales may use a disposal income A/c)	same pattern; an asset purchase is a capital purchase in the VAT return
Service Purchase / Service Sales	as above, with a service expense / service income A/c	same pattern
TDS - on Purchase	supplier (supplier / both ledgers), the supplier's Purchase Bills and Purchase Additional Expenses without TDS (newest first, tick one or many), TDS % (per bill or for all), TDS ledger + sub-ledger	Dr supplier (TDS), Cr TDS payable (TDS). With no bill: Dr expense (amount), Cr TDS payable, Cr supplier (amount less TDS)
TDS - on Sales	customer (customer / both ledgers), the customer's Sales Bills without TDS, TDS %, TDS receivable ledger + sub-ledger	Dr TDS receivable (TDS), Cr customer (TDS)

- TDS is only on the types that have it (not on a normal journal). The TDS ledger defaults from System Control and has its own **TDS Sub-Ledger**.
- TDS on bills: the base is each bill's value without VAT. A bill that has taken TDS (on a TDS journal, or on the bill itself) is not shown again; the journal keeps the list of its bills. Cancelling the journal frees them.
- The party list follows the side: suppliers + "both" ledgers for purchase, customers + "both" for sales. The voucher-line ledger list shows only that party side, the type's accounts (expense / income / asset), VAT and TDS ledgers.
- Example: taxable 1000, VAT 13% (130 worked out), non-taxable 1000 -> Purchase A/c 2000 Dr, VAT 130 Dr, supplier 2130 Cr.
- **Auto balance** (every JV): type 100 Debit on line 1, choose the ledger on the next line and press Enter - 100 Credit is filled in (and the other way round). You can change it.
- The lines are filled automatically and can still be edited; **Refill** puts them back.
- The type's options are in folding sections (**Vendor/Customer Details, Bill Details, Bills without TDS, TDS**): click the arrow to hide one after filling it - its summary stays on the right. TDS on Purchase and TDS on Sales are separate choices in the JV Type drop-down.
- **Narration** is one field in the footer (saved remarks are offered as you type).

Accounts: exactly the voucher lines. Tax types appear in the VAT register and VAT return; any TDS appears in the TDS report. Party lines create bill-wise references. **Stock:** none.

Cash / Bank Entry

- A receipt or payment voucher. The master has the Cash/Bank ledger; each line is a ledger (party, expense, income) with a Receipt or Payment amount, plus line remarks.

Accounts: Receipt: Dr Cash/Bank, Cr each line ledger. Payment: Dr each line ledger, Cr Cash/Bank. Bill-wise parties settle their oldest bills first (FIFO); you can adjust the suggestion.

Debit Note

- Increases what a party owes you, or reduces what you owe a supplier (rate difference, claim).

Accounts: Dr party, Cr the chosen ledger(s).

Credit Note

- Reduces what a customer owes you, or increases what you owe (discount after the bill, claim).

Accounts: Dr the chosen ledger(s), Cr party.

PDC (post-dated cheque)

- Record cheques received or issued with a future date. Deposit and then Realize (or Bounce).

Accounts: nothing until **Realized**. A received cheque then posts like a receipt, an issued cheque like a payment.

Bulk Cash Settlement

- Receive cash from many customers in one screen (e.g. after a route).

Accounts: one receipt per party (Dr Cash, Cr customer).

Bank Reconciliation

- Match bank statement lines (typed or imported) with book entries. Auto-match learns from your matches.
- Shows the Bank Reconciliation Statement and matched/unmatched lists.

Accounts: none (it only records clearing dates).

Interest on Overdue

- Works out interest on unpaid customer bills after their due date (+ grace days) at the ledger's interest %.

Accounts: posting the run debits each customer and credits Interest Income. A bill is never charged twice for the same days; cancelling the run reverses it.

Depreciation Posting

- Choose the period; review the preview; post.

Accounts: Dr Depreciation expense, Cr Accumulated depreciation (or the asset ledger). Selling an asset on a Sales Bill disposes it automatically: its book value leaves the asset and the gain/loss shows in the disposal ledger.

Budgets

- Budget amounts by ledger, sub-ledger, cost center, unit or document class, per month. Compared in Budget vs Actual.

Account Confirmation Letters

- Balance confirmation letters for parties, printed or sent by message.

3.2 Sales Transaction

The normal flow is Quotation -> Order -> Delivery (Challan) -> Bill -> Return. Each later document can pull from the earlier ones (**Pending** button in the master part), as allowed by Entry Field Control. The **Quotation No. / Order No. / Challan No.** boxes are right after the Customer / Vendor. After choosing the party, Enter moves into these boxes: the first Enter on a box opens that party's pending list (tick, then Pull), the next Enter moves on to the next box and then the rest of the form. Type a number in a box to find a document of any party. The same boxes are on every sales and purchase entry (Quotation, Order, Challan / GRN, Bill, Return, Non-saleable Return). Pulling also brings the source's master part - sub-ledger, product company, agent, area, route, cost center, remarks, narration, rate type, currency - and its billing terms (document and product-wise) into the new entry:

Document	Can pull from
Order	Quotation
Delivery / Challan	Quotation, Order
Bill	Quotation, Order, Delivery
Return	Bill

Only quantities still pending are offered. The source document shows as partially or fully used.

Sales Quotation

- A price offer to a customer.

Accounts / Stock: none.

Sales Order

- The customer's confirmed order. The credit limit is checked.

Accounts / Stock: none. Pending orders show in reports and on the mobile app.

Order -> Bill (single / multiple)

- Turn one or many orders into bills in one step, with rate and qty editable.

Effect: as Sales Bill.

Sales Delivery / Challan

- Goods leave the warehouse before (or without) the bill.

Stock: OUT. **Accounts:** none (the bill books the sale).

Sales Bill / Invoice

- The tax invoice. Cash or credit. Includes product-wise and bill-wise terms, currency, and bill-wise settlement of advances.

Accounts: Dr Customer with the bill total; Cr Sales account per product line; Cr VAT Payable; each term to its ledger.
Stock: OUT only for lines **not** already delivered by a challan. **IRD:** the bill goes to the IRD sales register and is sent to CBMS when enabled.

Receipt / TDS button (footer of the Sales Bill):

- **Received with this bill:** one line per cash or bank ledger, e.g. a 500 bill with 100 in cash and 400 in NIC Asia Bank. Use + **Cash** / + **Bank**, choose the ledger, type the amount (and cheque no.).
- **Cash bill:** cash + bank + TDS must equal the bill total. If you enter nothing, the whole bill is taken as received in the default Cash ledger (System Control).

- **Credit bill:** enter what was paid now, e.g. 300 of a 500 bill; the remaining 200 stays outstanding on the customer.
- **TDS deducted by the customer:** TDS % (or amount) on the VAT-exclusive value, TDS Receivable ledger (default from System Control).

Accounts: Dr each cash / bank with its amount, Dr TDS Receivable, Cr Customer. The bill shows only the balance as outstanding. Cancelling the bill reverses all of it.

Sales Return

- Goods returned by a customer, against the bill.

Accounts: Dr Sales Return (or sales) account, Dr VAT, Cr Customer. It settles the customer's open bills first. **Stock:** IN.

Sales Non-saleable Return

- Damaged or expired goods returned.

Stock: IN to the separate non-saleable stock, not to saleable stock. **Accounts:** with credit, like a Sales Return; with no credit, none.

Sales Additional Entry

- Extra charges billed to a customer later (freight, packing, interest), or deductions.

Accounts: Dr Customer, Cr income ledger for each add line (Dr for each deduct line). **Stock:** none.

Salesman Targets & Commission

- Set targets per salesman or period, see achievement (the target report), and post commission once per target.
- **Bill-wise Commission:** the salesman's posted bills (value without VAT, less returns against the bill) with the salesman's commission %. Change the % or amount per bill, tick one or all, and post. A bill that got commission is never offered again; cancelling the posting in the Commission Register frees its bills.

Accounts: Dr commission expense / Cr commission payable (salesman's ledgers, or chosen on posting).

Small Balance Write-off (Journal Voucher)

- Journal Voucher > JV Type "Small Balance Write-off (bulk)" (or Accounts > Small Balance Write-off).
- Choose customers / suppliers / both, Dr / Cr balances, the "up to" amount (e.g. 50) and the date; list; tick all or some; choose the discount ledgers; post.
- One JV nils all ticked parties; their open bills are settled. Cancelling the JV undoes it.

Accounts: Dr balances - Dr Discount Allowed / Cr party; Cr balances - Dr party / Cr Discount Received.

Mobile Approvals

- Cash receipts and sales returns entered on the salesman's phone wait here as pending (no effect).
- Tick one, several or all and **Post ticked**. The salesman is already the agent on each entry.

Accounts: receipt - Dr mobile cash ledger, Cr customer; return - as Sales Return. **Stock:** returns come in on posting.

3.3 Purchase Transaction

The flow is Quotation -> Order -> GRN -> Bill -> Return, with the same pull rules: Order <- Quotation; GRN <- Quotation + Order; Bill <- Quotation + Order + GRN.

Purchase Quotation

- A supplier's price offer.

Accounts / Stock: none.

Purchase Order

- The order sent to a supplier.

Accounts / Stock: none.

Purchase GRN (Goods Receipt Note)

- Goods received before the bill arrives.

Stock: IN. **Accounts:** if a GRN Clearing ledger is set in System Control: Dr Goods (purchase) account, Cr GRN Clearing (a temporary liability until the bill comes). Otherwise none.

Purchase Bill

- The supplier's invoice.

Accounts:

- Bill without GRN: Dr Purchase account per product line (without VAT), Dr VAT (input), Cr Supplier; terms to their ledgers.
- Bill from a GRN: Dr GRN Clearing, Cr Supplier, and the VAT moves from the goods account to the VAT ledger.

Any advance paid to the supplier is settled first (FIFO).

TDS (TDS button in the footer): TDS % or amount on the VAT-exclusive value. Dr Supplier, Cr TDS Payable - the supplier is owed the bill less TDS. Shown in the TDS Report.

Stock: IN only for lines **not** already received by a GRN.

Purchase Bill from Image / PDF

- Upload a photo or PDF of a supplier bill. The system reads it and fills a Purchase Bill for you to check and save.

Effect: as Purchase Bill.

Additional Expenses (Purchase Additional Bill)

- Freight, customs, insurance or labour on goods already billed. Choose the **Ref. Bill No.** (required) - only the purchase bill is linked, not the order or GRN. The bill's vendor comes in as the vendor; change it when someone else is paid. Older entries linked to an Order / GRN show it as "Linked (older entry)".
- The Ref. Bill date / amount and its product lines are shown.
- **Product-wise Terms** tab (first): the products of the linked document; **Terms...** opens that product's terms (Billing Terms with Purchase Additional + Product Wise). Rate % is of that product's value. The whole amount goes to that product's cost.
- **Bill-wise Terms** tab: a fixed form with one row per bill-level Purchase Additional term. Fill the amounts that apply. Each row is divided over the bill's products by the term's basis (value or qty; changeable per row). Empty rows are left out.
- A term's **ledger is fixed** by the term; only its **sub-ledger** can be changed. **Paid to** (the other ledger) and its sub-ledger are chosen freely - empty means the entry's vendor.
- Each row (one line per term) has Paid to, Supplier Bill No, Bill Date, VAT % and VAT. The **bill type is automatic**: VAT on the row = taxable bill, a bill no without VAT = tax-free bill, neither = no bill (wages, loading ...). Rows of one

party with the same bill no make one bill (its taxable and tax-free parts are kept apart) and the party is credited with it. Because these are per row, **one entry can hold several taxable bills** (e.g. freight bill of transporter A with VAT, customs agent B's bill with VAT); each (party, bill no) is its own bill in the Purchase VAT register. A term not "Include In Costing" stays out of the cost; claimable VAT is never cost.

- **TDS** is worked out by itself (**Auto TDS**): every line has a **TDS %** column - from its Billing Term (*TDS Applicable + TDS %*, empty % = System Control default TDS %), changeable per line (0 = no TDS). One TDS line per party and rate follows every change of amount, party, term or TDS % - base = that party's lines at that rate, without VAT; ledger / sub-ledger from System Control. E.g. Freight 6,000 at 1.5 % -> TDS 90 and Loading 1,000 at 15 % -> TDS 150, as two TDS lines. Typing on a TDS line takes it over by hand (Auto TDS off); **Recalculate TDS** rebuilds once. TDS is non-additional - never added to cost. It appears in the TDS Report.
- Totals as on the paper form: Prd. Additional / Prd. Non-Additional (product-wise terms), Gen. Additional / Gen. Non-Additional (bill-wise terms), Net Additional (to stock cost), Net Non-Additional (claimable VAT, TDS, terms not in costing), Total and Net Total.
- The header shows the **vendor of the Ref. Bill (read only)**; there is no Cash / Credit choice - every line has its own **Credit A/c** (vendor, cash, bank, customs agent or any balance-sheet ledger; empty = Ref. Bill vendor). The allocation basis comes from the Billing Term; the term ledger's **Sub-Ledger** is a column of its own.
- **Customs (Bhansar)** tab - **for the VAT report only, no ledger posting** (the account effect of customs duty / VAT comes from the Bill-wise or Product-wise terms): one row per Pragyapan Patra - PP no / date, **Customs Office** (drop-down from the Customs Offices master - Nepal's offices are created with a code), **Bill-wise or Item-wise**; Assessable Value, Taxable Value, Tax-free Value, VAT % and VAT. Item-wise enters the values per product of the Ref. Bill and sums them on the row. The Purchase VAT register shows it as an **Import** purchase (taxable = import taxable); "Show items under each bill" / Item-wise view lists the products.
- **Credit Sub-Ledger** column beside Credit A/c (empty Credit A/c = Ref. Bill vendor; its sub-ledger can still be picked).
- **JV button** on every transaction list (sales, purchase, returns, additional bills, cash / bank, journal, PDC, production, stock transfer ...): shows the ledger entry (JV) the transaction posted - ledger, sub-ledger, Dr / Cr and the Dr = Cr check.
- Bottom tabs: **Goods Details** (Ref. Bill products with additional, net amount and cost / unit), **Party Bills / VAT** (per party and bill: taxable amount, VAT, tax-free amount, less TDS, amount credited to the party) and **Account Posting** (the exact ledger entry, Dr = Cr). The **Totals** panel on the right shows Prd. / Gen. additional and non-additional, taxable, VAT, tax-free, TDS and the Net Payable, with a check that it equals the party credit in the posting.

Accounts: Dr term / expense ledger with its sub-ledger (+ VAT when VAT is part of cost), Dr VAT (claimable), Cr supplier/party with its sub-ledger; a deduct line credits the ledger and reduces the party. **Stock value:** the allocated amount is added to the cost of the linked purchase lines (landed cost).

Purchase Return

- Goods returned to a supplier.

Accounts: Dr Supplier; Cr Purchase Return (or purchase) account per line; Cr VAT. It settles the supplier's open bills.
Stock: OUT.

Non-saleable Return (Purchase)

- Damaged stock sent back or written off.

Stock: OUT of non-saleable stock. **Accounts:** a write-off debits Write-off Expense and credits Non-saleable Stock Asset; a credit note works like a Purchase Return.

LC Register & Mapping

- Letters of credit: opening, amendments, expiry, linking to purchase documents, and LC cost.

3.4 Production

Production Order

- Pick the finished product (and BOM). Raw materials are filled from the BOM and can be changed; enter output qty and by-products. Billing terms (% , rate or amount) can add extra costs.

Stock: raw materials OUT, finished goods and by-products IN, valued at the raw-material cost plus costs (split over joint products). **Accounts:** none directly; the value shows through stock.

BOM Template

- See 2.2.

3.5 Inventory

Stock Transfer

- Move stock between warehouses or branches. A two-step branch transfer is dispatched first and received later.

Stock: OUT from the sending warehouse, IN to the receiving one; company total unchanged. **Accounts:** only if Stock Transfer GL Posting is on: Dr receiving stock account, Cr sending stock account. In two-step mode the entries go through Goods in Transit.

Stock Adjustment (shortage, damage, excess; also used by poultry consumption)

Stock: IN or OUT. **Accounts:** a shortage or damage debits Stock Loss/Damage expense and credits Stock Adjustment; an excess debits Stock Adjustment and credits Stock Gain.

Barcode / Label Printing

- Print barcode labels for products, with ready formats or your own design.

3.6 Automobile, Construction, Poultry, Office

• Automobile:

- Customer Enquiry; PDI / Vehicle Delivery (vehicle stock to customer); Job Card (workshop service, parts issued, labour, outside work); Service Reminders.
- Vehicle and parts sales post like Sales Bills; parts issued move stock OUT.

• Construction:

- Sites / Contracts (thekka); Running Bills to the client; sub-contracts (petti thekka); material issue to site (stock OUT); wages per site.
- Site profit = billed - material - wages - sub-contract.

• Poultry & Hatchery:

- Broiler batch placement (chicks in); daily log of feed, medicine, vaccine and mortality (stock OUT to the batch); lifting (sale of birds, posts like a sales bill).
- Hatchery: egg set, candling, hatch (chicks IN).

• Office:

- Tasks (assign, follow up, due dates).
- Darta / Chalani register (incoming/outgoing letters with number and date).
- No accounting or stock effect.

4. Accounts Report menu

4.1 Accounts & Finance

Report	What it shows
Ledger Report (detail / summary / monthly)	Every entry of a ledger with running balance; summary per ledger; month-wise totals. PDC can be shown separately.
Party Summary	Per party: opening, sales, returns, receipts, payments, notes, closing.
Day Book	All entries of a day or period.
Cash & Bank Book	Cash and bank ledgers with daily balances.
Trial Balance	Every ledger's Dr/Cr balance.
Profit & Loss	Income and expenses; stock valued by the chosen method.
Balance Sheet	Assets, liabilities, equity, with closing stock.
Schedules / Notes	Group-wise break-up with opening, Dr, Cr, closing.
Ratio Analysis, Cash Flow, Funds Flow	Standard financial analysis from the same figures.
Group Mapping	Where each account group lands in the P&L / Balance Sheet.
Net Position of Funds	Cash, bank, receivables and payables position.
Bank Reconciliation Statement, Matched/Unmatched	From Bank Reconciliation.
Outstanding, Ageing, Bill-wise Ageing	Unpaid bills by party and by age bucket.
Interest on Overdue (register)	Posted interest runs.
Balance Confirmation Letters	Letters to parties.

4.2 Budget & Dimensions

- Budget vs Actual and variance (by ledger, sub-ledger, cost center, unit, document class).
- Sub-ledger summary and statement.
- P&L by cost center, unit, branch or document class.
- Cost center x ledger and monthly trend.
- Document class register (number gaps).
- Missing dimensions.

4.3 VAT, TDS & IRD

- Sales/purchase VAT register, VAT monthly summary, Annex 13 (above threshold), VAT return, VAT ledger, TDS report.
- IRD materialized view, IRD sales book, CBMS sync status (resend failed bills), IRD bill audit log.
- **Reconciliation (VAT / Sales / Purchase / TDS)** - checks that the registers and the books agree for the chosen dates, document by document, including taxable Journal Vouchers (JV purchase / sales / TDS):
 - **Overview:** the four checks side by side, each marked *Tallied* or *Not tallied*.
 - **VAT:** VAT register vs all VAT ledgers. **Sales Account:** sales register vs sales accounts. **Purchase Account:** purchase register (with expense bills and JV purchases) vs purchase / goods accounts; a bill made from a GRN is checked together with that GRN. **TDS:** TDS on bills, JVs and expense bills vs TDS ledgers.
 - Each document shows Register, Books and Difference with a status: *Matched*, *Difference*, *Only in register* (not posted to these accounts) or *Only in books* (for example a normal JV posted to the VAT ledger, or a GRN not billed yet). Click a summary box to see only those.

- The accounts compared are found automatically (System Control, products, documents, VAT terms); add or remove an account with the chips, *Automatic* goes back.
- Signs: VAT, sales and TDS are Cr - Dr (input VAT and TDS receivable show as minus); purchase is Dr - Cr.

4.4 Control & Registers

- Universal Register (every document of every module).
- Cancelled documents, draft (unposted) documents, master data exceptions.
- LC / BG / PDC dashboard, PDC report.
- Document print status.
- Audit Log (every change with old and new value) and audit coverage.

5. Sales/Purchase menu (reports)

- **Sales, Salesman & Routes:**

- Sales/purchase analysis (by party, product, group, area, and so on), monthly analysis, profitability, rate history, rate & discount history.
- Salesman-wise, route-wise and area-wise sales; route plan vs visit; not visited; visit log.
- Order register, pending orders, order fill rate, product-wise orders.
- Target vs achievement, salesman performance, commission register.
- Customer lists, credit exceeded, inactive customers, loading sheet.

- **Purchase:** purchase register, GRN outstanding (received but not billed), supplier list, LC register, consignment cost.

- **Inventory & Production:**

- Stock report, stock movement (opening + in - out = closing, qty and value), stock in/out, stock valuation, stock ageing & expiry, re-order & over-stock, non-moving items, price list.
- Production register, raw material consumption, BOM vs actual, production cost trend.
- Fixed asset schedule and depreciation detail.

- **Poultry, Construction, Automobile:** the industry reports listed in the menu (batch profitability, mortality, site profit, job card register, and so on).

6. Analysis menu

- **Dashboards:** the main dashboard (widgets and graphs you can arrange), work dashboard, LC/BG/PDC dashboard, PDC dashboard, poultry dashboard.
- **Sales & Profit Analysis:** as in section 5.
- **Forecasting & Inventory Analytics:**
 - FSN (fast/slow/non-moving), ABC, XYZ and the ABC-XYZ matrix.
 - Stock cover and stock-out forecast, inventory turnover, dead stock.
 - Sales/purchase forecast, purchase plan, weekly cash-flow forecast.
 - Period comparison, customer RFM (new and lost customers), income & expense comparison, DSO/DPO.

All reports are read-only: they never change accounts or stock.

7. Setup menu

7.1 Company & Control

System Control

The main switchboard:

- **Business Nature and features:** trading, poultry, construction, automobile.
- **Default ledgers:** sales, purchase, returns, VAT, GRN clearing, rounding, stock transfer/adjustment, non-saleable.
- **Stock:** valuation method (FIFO, moving average, weighted average, last purchase), batch/serial costing, negative stock control, multiple warehouses.
- **Dual unit:** fixed or flexible.
- **Grid columns:** free qty, batch, alternate unit, mfg/expiry.
- **Party defaults:** bill-wise tracking and credit control.
- **Approval Needed For:** modules that must be approved before posting.
- **Transactions that show product-wise terms.**
- **Computerized Billing (IRD)** and CBMS settings.

Effect: changes how every later entry posts. Change ledgers or methods with care after posting has started.

Fiscal Years

- Create and close fiscal years (BS). Numbering and reports follow the fiscal year.

Branches & Warehouses

- Branches and their warehouses, each with an optional stock ledger (used by stock transfer posting).

Business Units

- Units/divisions to tag entries with; P&L by Unit.

Ledger Mapping

- Map special purposes (cash, bank, VAT, round-off, and so on) to ledgers.

Document Numbering

For each document type (and branch/user if needed), create numbering categories:

- **Mode:**
 - **Automatic:** running number.
 - **Manual numeric** or **manual alpha-numeric:** typed.
 - **Automatic date-wise:** the number restarts every day, with a date part.
 - **Automatic month-wise:** restarts every month.
- Prefix, suffix, starting number, fill character, length, maximum length (or flexible length).
- Date format and Nepali/English date.
- Valid from/to dates.

The entry shows the next number before you save.

Currencies

- Currency code, name, symbol and exchange rate (NPR is the base). Choose a currency on an entry to see the Local Amount in NPR.
- Note: posting to accounts currently uses the entered amount, so keep posted entries in NPR until local-currency posting is added.

Entry Field Control

For each transaction (and user, if needed):

- Which fields show, which are compulsory, their default values, and which cannot be changed.
- Which source documents may be pulled (Quotation, Order, Challan/GRN).

User Defined Fields

- Add your own fields to masters and documents; they can be printed.

7.2 Users & Security

- **Users:** create users, link them to a security group and branch, reset passwords.
- **Security Groups:** rights per menu (view, create, edit, delete, print), plus the **Approvals** section (which documents this group may approve).
- **Data Access:** limit what a user or group can see: ledgers, sub-ledgers, products, companies, groups, categories and areas. Hidden items are removed from lists and reports.
- **Audit Log:** every change with who, when, old value and new value.
- **Change My Password.**

7.3 Printing & Messaging

- **Document Designer:** design bill/voucher print layouts (fields, logo, columns, user-defined fields).
- **Messaging Templates & Auto-send:** email, SMS, WhatsApp and Viber templates; send automatically when a document is posted (e.g. bill to customer); outstanding reminders in bulk.
- **My Notification Settings:** which alerts you receive, and how.

8. Tools and Office menus

- **Views (every screen):** on the title bar of every report. Set the tab, filters and options, filter / sort / hide columns with in the column headers (> *Hide this column*; grouped headers such as Sales / Purchase work too), then **Save As** a named view - mine or shared with colleagues, one of mine can open by default. Opening a view puts the tab and fields back, presses Show and restores the column filters, sort and hidden columns. *Columns* lists the columns to show / hide; *Reset filters & columns* clears them. (Pop-up pickers such as a party are not kept in a view.)
- **Import from another Firm (Tools):** copy masters (account groups, ledgers, sub-ledgers, units, product groups / categories / companies, products, areas, agents, routes, cost / profit centres, business units, warehouses, currencies, billing terms, transport, remarks) and transactions (sales / purchase orders, bills, returns, credit / debit notes, cash / bank entries, journal vouchers) from another firm you can open. Masters are matched by code (only new ones added, or existing ones updated if chosen); documents come in as drafts - **Post imported drafts** posts them here. Nothing is imported twice.
- **Super Admin:** logs in to the **Admin Panel** (all companies, users, last login, subscription; suspend / activate; new company). A company opened from there is **VIEW ONLY** - the server refuses every entry, change or delete; *Admin Panel* on the title bar goes back.
- **Report Center:** every report in one place with search.
- **Manual Document Printing:** print or reprint documents in bulk.
- **Messaging:** send documents or statements; see the message log.
- **IRD Compliance / CBMS:** the IRD register, sync status and resend.
- **Salesman Mobile App:** the salesman sees only the route(s) planned for them on the day (a date-range plan shows on each date of the range). Opening a route lists its customers in visiting sequence, with search. Per customer: **Order** (becomes a Sales Order), **Receipt** (cash / cheque / online) and **No order**. The **Return** tab takes a sales return from a customer of any area / route. Receipts and returns are tagged with the salesman and wait for the office in **Small Balance Write-off (Journal Voucher)**
- Journal Voucher > JV Type "Small Balance Write-off (bulk)" (or Accounts > Small Balance Write-off).
- Choose customers / suppliers / both, Dr / Cr balances, the "up to" amount (e.g. 50) and the date; list; tick all or some; choose the discount ledgers; post.
- One JV nils all ticked parties; their open bills are settled. Cancelling the JV undoes it.

Accounts: Dr balances - Dr Discount Allowed / Cr party; Cr balances - Dr party / Cr Discount Received.

Mobile Approvals. Settings per salesman (Route Plan > Mobile): allow receipts / returns, the mobile cash ledger, off-route customers.

- **Day Book (all-in-one):** one day or a period, with filters for user, salesman / agent, voucher type (sales, returns, purchase, receipts, payments, PDC, journal, notes ...), party and drafts. It shows sales / purchase split into cash and credit, returns, receipts and payments split into cash and bank, PDC, the cash & bank book (opening and closing for the whole business), a party-wise credit summary with closing balances, totals per agent and per user, and every voucher. Without user / agent it is the overall day book.
- **VAT reports (advanced)** in Sales / Purchase VAT Register: **Annexure 13** (party code, name, PAN, Debtor / Creditor, opening balance, capital / other / goods purchase, capital / other / goods sales, closing balance), **Sales / Purchase Monthly** (per VAT month: sales invoices, total, non-taxable, export, taxable, tax; purchase invoices, total, non-taxable, taxable, tax, import taxable, import tax; grand total) and **Party-wise VAT Summary** (PAN, name, P / S, bills, taxable, exempted, VAT). Options: include purchase return, sales return, debit note, credit note, additional bills, taxable JV; sort on; PAN with / without; show PAN; hide opening / closing; transaction / balance amount >=; export and print. Goods = inventory items, capital = fixed-asset items / capital JVs, other = services, additional bills, JVs, notes; export = foreign-currency sales. The Register also has Sort On, Company and Show Sub-Ledger.

- **Daily Register (one-page day sheet):** the counter's paper day sheet, filled from posted vouchers - Sales cash (A) / credit (B), Purchase cash (C) / credit (D), Received / bank withdraw cash (E) / bank (F), Expenses / bank deposit cash (G) / bank (H), customer (I) / supplier (J) returns; opening cash + A + E - C - G - refunds = expected closing against the books' closing; sales / purchase from the fiscal year start to date; opening / closing stock, gross and net profit; a note count (1000 ... coin) with the difference against books, and the day's note. User / agent filter; Print.
- **Consignment Costing (date-wise)** (Consignment Cost first view): per bill, per product - Qty, Rate, Basic, Add / Less, Net Basic, one column per additional term and per non-additional term, Total Additional, Total Non-Additional, Net Amount and Cost Rate, with a Bill Total row and a Grand Total.
- **Ledger + Sub-ledger Balance:** every sub-ledger's opening / debit / credit / closing with the ledger balance after them, and a Module filter (sales, purchase, cash / bank, journal, inventory, other).
- **Stock Valuation:** batch / serial items follow System Control's batch / serial costing; batch-wise costing values each batch at its own cost, including the landed cost of Purchase Additional. Profitability costs a sale of a batch / serial the same way.
- **Loading Sheet:** items to load with qty by UOM mode (fixed dual "5 Crt 2 Pcs · Total 62 Pcs", flexible "5 Crt = 10 Pcs"), and a Total row with the qty as entered per unit and the total in base unit. Print it together with the **Bill Summary** (and Bill x Item) on one sheet.
- **Office:** work dashboard, tasks, Darta/Chalani, notification settings, and their reports.

9. How the numbers fit together

- **Stock value in the Balance Sheet** comes from the stock movements valued by your chosen method, not from a ledger. That is why a sales bill does not post a "cost of goods sold" entry: profit is worked out as Sales - (Opening Stock + Purchases - Closing Stock) - Expenses.
- **Challan then Bill** (or **GRN then Bill**): stock moves once, on the challan/GRN. The bill books the accounts only.
- **Cancel** always undoes everything the document did: ledgers, stock, bill-wise settlements, and the "used" quantity on the source documents.
- **Drafts and entries awaiting approval** never appear in accounts or stock reports; see Control Reports > Draft Documents.
- **Bill-wise parties**: every bill, return, receipt and note is matched oldest-first (FIFO). The Outstanding and Ageing reports show what is still open.

Screen reference

Sales

Mobile Approvals (receipts / returns)

Menu: Sales · **Type:** entry

Cash receipts and sales returns the salesmen entered on the phone wait here as pending drafts until the office posts them.

How to use

1. Filter by type, status, salesman and dates.
2. Tick one, several or all (tick box in the header) and Post ticked.
3. Open screen opens Cash / Bank Entry or Sales Return to change an entry before posting.

Effect

Where	What happens
Accounts	On posting - receipt: Dr the mobile cash ledger, Cr the customer (bill-wise settled); return: as Sales Return. The salesman is the agent on both.
Stock	Return: goods come back in on posting.
VAT	Return: reduces output VAT on posting.
Other modules	Pending entries have no effect at all. The salesman sees them as "Pending approval" on the phone.

Fields on this screen

Field	What it does / where its effect goes
Status	Document status: draft, posted, cancelled ...
From	First date of the report period.
To	Last date of the report period.

Order -> Bill (single / multiple)

Menu: Sales · **Type:** entry

Turn one or many pending sales orders into sales bills in one go, with qty / rate changes.

How to use

1. Filter orders (date, customer, agent, route).
2. Tick the orders; adjust qty / rate per line.
3. Make bills: one bill per customer.

Effect

Where	What happens
Accounts	Each bill made posts like a Sales Bill.
Stock	Stock goes out with each bill.
VAT	Output VAT on each bill.
Other modules	The orders' billed qty moves; fully billed orders close.

Sales Additional Entry

Menu: Sales · **Type:** entry

Extra charges or discounts on already issued sales bills (freight recovered, rate difference, scheme).

How to use

1. Choose the customer and the bill(s).
2. Add the charge / discount lines with their ledgers.
3. Save.

Effect

Where	What happens
Accounts	Dr / Cr the customer against the chosen ledgers.
Stock	None.
VAT	As per the lines.
Other modules	Bill-wise outstanding of the bill changes.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Sales Bill / Invoice

Menu: Sales · **Type:** entry

Tax invoice to the customer. Posts the sale, the VAT and (for a direct bill) takes the stock out.

How to use

1. Choose the date (AD / BS), Cash or Credit, then the customer. Quotation / Order / Challan No. boxes right after the customer pull pending documents of that customer (Enter opens the list).
2. Add lines: item code or barcode, qty, unit, rate (from the customer's rate type), discount; Add / Less opens the product-wise terms when Item Charges is on.
3. Check the footer: gross, terms (VAT, discount, freight), net amount; party address / PAN tab can update the master.
4. Save (or Save as Draft). The action bar also has New, Modify, Cancel, Remove and Print.
5. Receipt / TDS tab: record money received now - cash and / or several banks, one line each - (cash bill: all of it; credit bill: part payment allowed) and TDS the customer withholds.
6. With IRD Billing on, a posted bill cannot be modified or removed - only cancelled.

Effect

Where	What happens
Accounts	Dr Customer (bill total) / Cr Sales account per line (product account > document Sales Account > System Control) / Cr VAT ledger / terms to their ledgers. Receipt lines: Dr cash / bank, Cr customer. TDS: Dr TDS receivable, Cr customer.
Stock	Direct lines (not from a challan) go OUT of stock. Services, non-inventory and fixed-asset lines do not move stock. Negative Stock control applies (confirm to post anyway when allowed).
VAT	Output VAT to the Sales VAT register, VAT return, IRD register and CBMS.
Other modules	Order / challan pending qty moves; bill-wise outstanding (credit); agent sales and commission; customer credit limit; IRD print count.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Salesman / Agent	Salesman / agent of the sale: used for agent-wise sales, targets and commission.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Sales Account	Sales (income) account for this document when the product has none. Product account > this account > System Control Sales Account Mapping.
Sales Sub-Ledger	Sub-ledger of the sales account for this document.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Order No.	Pull from a pending order of this party (pending qty only). Master part, remarks and billing terms come along. The order's delivered / billed qty moves when this entry posts.
Challan No.	Pull from a pending delivery challan. The stock already went out on the challan, so the bill lines from it do not move stock again.
Base	Amount TDS is worked out on (default: the bill value without VAT).
TDS %	TDS rate. TDS amount = base x %. Sales: TDS the customer withholds (Dr TDS receivable, Cr customer). Purchase: TDS we withhold (Dr supplier, Cr TDS payable).
TDS Amount	TDS in rupees; typed or worked out from base x %.
TDS Ledger	TDS payable (purchase) or TDS receivable (sales) ledger; defaults from System Control.
TDS Sub-Ledger	Sub-ledger of the TDS ledger (e.g. TDS type / section).
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.

Field	What it does / where its effect goes
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Tips

- F1 on a line shows this customer's rate history for the item.
- Cancel reverses accounts, stock and IRD status; a posted bill is never deleted under IRD.

Sales Delivery / Challan

Menu: Sales · **Type:** entry

Goods sent to the customer before the bill (delivery note / challan).

How to use

1. Choose the date (AD / BS), Cash or Credit, then the customer. Quotation / Order / Challan No. boxes right after the customer pull pending documents of that customer (Enter opens the list).
2. Add lines: item code or barcode, qty, unit, rate (from the customer's rate type), discount; Add / Less opens the product-wise terms when Item Charges is on.
3. Check the footer: gross, terms (VAT, discount, freight), net amount; party address / PAN tab can update the master.
4. Save (or Save as Draft). The action bar also has New, Modify, Cancel, Remove and Print.
5. Vehicle, driver and transport can be recorded for the challan print.

Effect

Where	What happens
Accounts	None - the bill made from it posts the sale.
Stock	Stock goes OUT on posting (warehouse / batch / serial of each line). Negative Stock control applies.
VAT	None (VAT is on the bill).
Other modules	Challan No. on the Sales Bill pulls it; those bill lines do not move stock again.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.

Field	What it does / where its effect goes
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Vehicle No	Vehicle carrying the goods - printed on the challan / transfer.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Driver Name	Driver of the vehicle.
Transport	Transporter (Transport Master).
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Order No.	Pull from a pending order of this party (pending qty only). Master part, remarks and billing terms come along. The order's delivered / billed qty moves when this entry posts.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Sales Non-saleable Return

Menu: Sales · **Type:** entry

Damaged / expired goods returned by a customer that cannot be sold again.

How to use

1. Pull the bill with Bill No., enter the damaged qty and reason.
2. Save.

Effect

Where	What happens
Accounts	Dr Non-saleable return account / Cr customer.
Stock	Kept apart as non-saleable stock (not in saleable stock).
VAT	As per the return.
Other modules	Counts against the bill's returned qty together with normal returns.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Settlement Type	How the return is settled: against the bill (adjusts that bill's outstanding) or on account.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Sales Order

Menu: Sales · **Type:** entry

Customer's confirmed order. Checks the credit limit; can be billed later (single or many orders at once in Order -> Bill).

How to use

1. Choose the date (AD / BS), Cash or Credit, then the customer. Quotation / Order / Challan No. boxes right after the customer pull pending documents of that customer (Enter opens the list).
2. Add lines: item code or barcode, qty, unit, rate (from the customer's rate type), discount; Add / Less opens the product-wise terms when Item Charges is on.
3. Check the footer: gross, terms (VAT, discount, freight), net amount; party address / PAN tab can update the master.
4. Save (or Save as Draft). The action bar also has New, Modify, Cancel, Remove and Print.
5. Pull from a quotation with Quotation No. if one was given.

Effect

Where	What happens
Accounts	None.
Stock	None (only reserved in order reports).
VAT	None.
Other modules	Pending order qty feeds Pending Orders, Order Fill Rate and the salesman order register. Credit limit control warns / blocks per the customer.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.

Field	What it does / where its effect goes
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Sales Quotation

Menu: Sales · **Type:** entry

Price offer to a customer. Pending quotation lines can be pulled into a Sales Order, Challan or Bill.

How to use

1. Choose the date (AD / BS), Cash or Credit, then the customer. Quotation / Order / Challan No. boxes right after the customer pull pending documents of that customer (Enter opens the list).
2. Add lines: item code or barcode, qty, unit, rate (from the customer's rate type), discount; Add / Less opens the product-wise terms when Item Charges is on.
3. Check the footer: gross, terms (VAT, discount, freight), net amount; party address / PAN tab can update the master.
4. Save (or Save as Draft). The action bar also has New, Modify, Cancel, Remove and Print.

Effect

Where	What happens
Accounts	None - a quotation posts nothing.
Stock	None.
VAT	None.
Other modules	Its qty is "pending" until pulled forward; the Order / Challan / Bill made from it reduces the pending qty.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.

Field	What it does / where its effect goes
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Tips

- Use Copy on a posted quotation to make a similar one.
- Quotation Register (Universal Register) lists them with status.

Sales Return

Menu: Sales · **Type:** entry

Goods coming back from a customer (credit note), normally against a bill.

How to use

1. Choose the customer and pull the bill with Bill No. - only the qty not yet returned is offered.
2. Give the return reason and settlement type; adjust qty.
3. Save.

Effect

Where	What happens
Accounts	Dr Sales Return account (product return account > sales account) / Dr VAT / Cr Customer.
Stock	Goods come back IN at their cost (the cost that batch / serial went out at, else the current average) - never at the selling rate.
VAT	Reduces output VAT (credit note in the VAT register; sent to CBMS as a bill return).
Other modules	The bill's returned qty moves; bill-wise settlement against the bill.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Sales Account	Sales (income) account for this document when the product has none. Product account > this account > System Control Sales Account Mapping.
Sales Sub-Ledger	Sub-ledger of the sales account for this document.
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Settlement Type	How the return is settled: against the bill (adjusts that bill's outstanding) or on account.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Salesman Targets & Commission

Menu: Sales · **Type:** entry

Targets per salesman (month / quarter / year, all products or a product / group / company / category, qty and / or value) and commission rules; achievement and commission posting.

How to use

1. Set Targets tab: add targets.
2. Target Achievement tab (the target report): target vs actual net sales, balance, achievement %; tick and post the earned commission (once per target).
3. Bill-wise Commission tab: posted bills of the salesman (value without VAT, less returns against the bill) with the salesman's commission %; change the % or amount per bill, tick one or all and post. A bill that already got commission moves to "Commission already given" and is never offered again; cancelling the posting frees its bills.

Effect

Where	What happens
Accounts	Commission posting: Dr commission expense / Cr salesman commission payable (ledgers from the salesman master, or chosen on posting).
Stock	None.
VAT	None.
Other modules	Commission Register lists every posting (target-wise and bill-wise) and cancels it (the GL entry is reversed).

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Show	Which rows to show (all / only differences / ...).

Purchase

LC Register & Mapping

Menu: Purchase · **Type:** entry

Letters of credit for imports: amount, bank, expiry, and which purchase documents used them.

How to use

1. Add the LC.
2. Map purchase orders / bills to it.
3. Actions: amend, close, extend.

Effect

Where	What happens
Accounts	None by itself (margin / charges through Cash / Bank or JV).
Stock	None.
VAT	None.
Other modules	LC / BG / PDC dashboard warns on expiry and over-use.

Fields on this screen

Field	What it does / where its effect goes
Bank Name	Bank of the cheque.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Purchase Additional Expense

Menu: Purchase · **Type:** entry

Freight, customs, clearing, insurance, labour ... on purchased goods - taxable or non-taxable bills of other parties, or no bill - allocated to the goods (landed cost).

How to use

1. Ref. Bill No. (required): the posted purchase bill the cost belongs to - only the bill is linked (not the order / GRN); its vendor comes in as the vendor (change it when another party is paid). Older entries linked to an Order / GRN are shown as "Linked (older entry)".
2. Product-wise Terms tab: the products of the linked document; Terms... on a product opens its terms (Billing Terms marked Purchase Additional + Product Wise) - rate % of that product's value or amount; the whole amount goes to that product's cost.
3. Bill-wise Terms tab: a fixed form with one row per bill-level term - fill the amounts that apply; each is divided over the products by the term's basis (value / qty, changeable per row). Empty rows are left out.
4. A term's ledger is fixed by the term - only its sub-ledger can be changed. "Paid to" (the counter ledger) and its sub-ledger are free; empty = the entry's vendor. One row per term: Paid to, Supplier Bill No, Bill Date, VAT % / VAT. The bill type is not chosen - VAT on the row = taxable bill, a bill no without VAT = tax-free bill, neither = no bill. Rows of one party with the same bill no are one bill (taxable + tax-free parts), credited to that party; several bills of several parties fit in one entry.
5. The header shows the vendor of the Ref. Bill (read only) - there is no cash / credit choice: each line and customs row has its own Credit A/c (vendor, cash, bank, customs agent or any balance-sheet ledger; empty = the Ref. Bill vendor). The basis of a term comes from Billing Terms; the term ledger's Sub-Ledger is picked on the line.
6. Customs (Bhansar) tab - for the VAT report only, no ledger posting (customs duty / VAT are posted by the Bill-wise or Product-wise terms): one row per Pragyapan Patra - date, Customs Office (from the Customs Offices master), Bill-wise or Item-wise; Assessable, Taxable, Tax-free values, VAT % and VAT (item-wise: per product of the Ref. Bill, summed on the row). The Purchase VAT register lists it as an Import purchase, with the items when item-wise.
7. Credit A/c and Credit Sub-Ledger on every line (empty = the Ref. Bill vendor and its sub-ledger).
8. Below: Goods Details (products of the Ref. Bill with additional, net amount, cost / unit), Party Bills / VAT (per party and bill: taxable, VAT, tax-free, less TDS, credited to the party) and Account Posting (the ledger entry that will be posted, Dr = Cr); the Totals panel shows the Net Payable, checked against the party credit of the posting.
9. TDS: each line has a TDS % - from its Billing Term (TDS Applicable + TDS %; empty = System Control default), changeable on the line (0 = none). With Auto TDS on, one TDS line per party and rate follows every change (amount, party, term, TDS %) by itself - base = that party's lines at that rate, without VAT. Typing on a TDS line turns Auto TDS off; Recalculate TDS rebuilds once.
10. Totals: Prd. Additional / Non-Additional (product-wise terms), Gen. Additional / Non-Additional (bill-wise terms), Net Additional (goes to the stock cost), Net Non-Additional (VAT claimable, TDS, terms not in costing), Total and Net Total.
11. Check the per-product preview (additional, cost / unit), then Save and post.

Effect

Where	What happens
Accounts	Dr each term / expense ledger with its sub-ledger (Cr for "-" terms) / Dr VAT (claimable) / Cr the party of each line with its sub-ledger. TDS lines: Cr TDS payable.
Stock	Posted: the allocated amount is added to the cost of the stock receipt of each linked line (landed cost); cancelled: taken out again. Terms not "Include In Costing" stay out of the stock cost.
VAT	Taxable / tax-free bills go to the Purchase VAT register as "Purchase Additional Bill"; Customs rows (VAT report only) as "Purchase Additional Bill (Import / Customs)" with import taxable and, item-wise, the products.

Where	What happens
Other modules	Purchase Account and Purchase vs Stock reconciliation show it separately; TDS register; bills can later be taken in a TDS journal.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Account Posting	Yes: the expense is posted to the ledgers. No: only the landed cost moves (e.g. already booked elsewhere).
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Purchase Bill

Menu: Purchase · **Type:** entry

Supplier's tax invoice. Books the purchase, input VAT and the payable.

How to use

1. Choose the date, Cash or Credit, then the vendor. Quotation / Order / GRN No. boxes right after the vendor pull pending documents (Enter opens the list).
2. Add lines: item, qty, unit, rate, discount; product-wise terms through Add / Less; document terms (VAT, freight) in the footer.
3. Save (or Save as Draft). New, Modify, Cancel, Remove and Print are on the action bar.
4. Party Bill No / Date: the supplier's invoice number (cannot be entered twice for the same supplier).
5. TDS tab: TDS withheld from the supplier.
6. Import fields for imports (declaration no, customs office, taxable / tax-free import value).

Effect

Where	What happens
Accounts	Direct bill: Dr goods account per line / Dr VAT / Cr vendor. Bill from a GRN: Dr GRN Clearing / Cr vendor, VAT moved out of the goods account. TDS: Dr vendor / Cr TDS payable.
Stock	Direct lines come IN at the goods value without VAT per base unit; lines from a GRN do not move stock again. Services / fixed assets do not go to stock.
VAT	Input VAT to the Purchase VAT register and VAT return (claimable).
Other modules	Order / GRN pending qty; bill-wise payable; TDS register; Purchase vs Stock reconciliation.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Due Days	Credit days; the due date is the document date plus these days.
Master Warehouse	Default warehouse for all lines of this document.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit (Business Unit)	Business unit every posting carries: P&L by unit, budgets.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Terms & Conditions	Terms printed at the bottom of the document (Remarks & Terms master).
Import Detail Mode	Import taxable / tax-free amounts for the whole bill, or item-wise.
Customs Office (Bhansar)	Customs office of the import.
Import Declaration No	Customs declaration (pragyapan patra) number of an import - VAT register import columns.
Declaration Date	Date of the customs declaration.
Import Taxable Amount (whole bill)	Taxable import value for the VAT register (Annex).
Import Tax-Free Amount (whole bill)	Tax-free import value for the VAT register.
PAN Number	PAN / VAT number of the party printed on the bill and used in VAT registers / IRD. Can update the master.
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Order No.	Pull from a pending order of this party (pending qty only). Master part, remarks and billing terms come along. The order's delivered / billed qty moves when this entry posts.
GRN No.	Pull from a pending GRN (goods received). Stock came in on the GRN; the bill clears the GRN clearing account and books the real payable.
TDS %	TDS rate. TDS amount = base x %. Sales: TDS the customer withholds (Dr TDS receivable, Cr customer). Purchase: TDS we withhold (Dr supplier, Cr TDS payable).
TDS Amount	TDS in rupees; typed or worked out from base x %.

Field	What it does / where its effect goes
TDS Ledger	TDS payable (purchase) or TDS receivable (sales) ledger; defaults from System Control.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Purchase Bill from Image / PDF

Menu: Purchase · **Type:** entry

Read a supplier bill photo / PDF (OCR) into a purchase bill draft.

How to use

1. Upload the image / PDF.
2. Check the read supplier, bill no, lines and amounts; map items.
3. Create the draft bill and post it from Purchase Bill.

Effect

Where	What happens
Accounts	Only when the bill is posted.
Stock	Only when posted.
VAT	Only when posted.

Fields on this screen

Field	What it does / where its effect goes
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Bill Date	Date of the supplier / customer bill.

Purchase GRN (Goods Received)

Menu: Purchase · **Type:** entry

Goods received before the supplier's bill.

How to use

1. Choose the date, Cash or Credit, then the vendor. Quotation / Order / GRN No. boxes right after the vendor pull pending documents (Enter opens the list).
2. Add lines: item, qty, unit, rate, discount; product-wise terms through Add / Less; document terms (VAT, freight) in the footer.
3. Save (or Save as Draft). New, Modify, Cancel, Remove and Print are on the action bar.
4. Enter the supplier's challan no / date.

Effect

Where	What happens
Accounts	Dr goods (purchase) account / Cr GRN Clearing (GR/IR) ledger - a provisional liability until the bill comes.
Stock	Stock comes IN at the goods value without VAT per base unit (after discount and non-VAT terms), plus landed cost of additional expenses posted against it.
VAT	None yet (VAT is taken on the bill).
Other modules	GRN Outstanding lists GRNs not yet billed; the Purchase Bill pulls it with GRN No.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Due Days	Credit days; the due date is the document date plus these days.
Master Warehouse	Default warehouse for all lines of this document.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit (Business Unit)	Business unit every posting carries: P&L by unit, budgets.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Terms & Conditions	Terms printed at the bottom of the document (Remarks & Terms master).
PAN Number	PAN / VAT number of the party printed on the bill and used in VAT registers / IRD. Can update the master.

Field	What it does / where its effect goes
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Order No.	Pull from a pending order of this party (pending qty only). Master part, remarks and billing terms come along. The order's delivered / billed qty moves when this entry posts.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Purchase Non-saleable Return

Menu: Purchase · **Type:** entry

Damaged / expired stock sent back to the supplier.

How to use

1. Pull the bill with Bill No.
2. Enter qty and reason.
3. Save.

Effect

Where	What happens
Accounts	Dr vendor / Cr non-saleable return account.
Stock	Out of non-saleable stock.
VAT	As per the return.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Invoice Type	Cash or credit, as Cash / Credit: decides whether the document leaves an outstanding against the party.
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).

Field	What it does / where its effect goes
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Settlement Type	How the return is settled: against the bill (adjusts that bill's outstanding) or on account.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Purchase Order

Menu: Purchase · **Type:** entry

Order placed on a supplier; received later with a GRN or a direct bill.

How to use

1. Choose the date, Cash or Credit, then the vendor. Quotation / Order / GRN No. boxes right after the vendor pull pending documents (Enter opens the list).

2. Add lines: item, qty, unit, rate, discount; product-wise terms through Add / Less; document terms (VAT, freight) in the footer.
3. Save (or Save as Draft). New, Modify, Cancel, Remove and Print are on the action bar.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Pending order qty; additional expenses (freight, duty) can be linked to the order and reach the goods when received.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Due Days	Credit days; the due date is the document date plus these days.
Master Warehouse	Default warehouse for all lines of this document.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit (Business Unit)	Business unit every posting carries: P&L by unit, budgets.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Terms & Conditions	Terms printed at the bottom of the document (Remarks & Terms master).
PAN Number	PAN / VAT number of the party printed on the bill and used in VAT registers / IRD. Can update the master.
Quotation No.	Pull from a pending quotation of this party: its lines (pending qty only), master part (company, agent, sub-ledger ...), remarks and billing terms come into this entry. Enter on the box opens the list.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).

Field	What it does / where its effect goes
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Purchase Quotation

Menu: Purchase · **Type:** entry

Supplier's price offer; can be pulled into a Purchase Order, GRN or Bill.

How to use

1. Choose the date, Cash or Credit, then the vendor. Quotation / Order / GRN No. boxes right after the vendor pull pending documents (Enter opens the list).
2. Add lines: item, qty, unit, rate, discount; product-wise terms through Add / Less; document terms (VAT, freight) in the footer.
3. Save (or Save as Draft). New, Modify, Cancel, Remove and Print are on the action bar.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Pending qty until pulled forward.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Cash / Credit	Cash: paid / received now - the party field becomes a name (or a cash ledger) and no outstanding is created. Credit: the amount stays outstanding against the party (bill-wise, ageing, credit limit).
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Due Date	Payment due date (Date + credit days). Ageing, overdue interest and reminders use it.
Due Days	Credit days; the due date is the document date plus these days.
Master Warehouse	Default warehouse for all lines of this document.

Field	What it does / where its effect goes
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit (Business Unit)	Business unit every posting carries: P&L by unit, budgets.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Terms & Conditions	Terms printed at the bottom of the document (Remarks & Terms master).
PAN Number	PAN / VAT number of the party printed on the bill and used in VAT registers / IRD. Can update the master.
Order No.	Pull from a pending order of this party (pending qty only). Master part, remarks and billing terms come along. The order's delivered / billed qty moves when this entry posts.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Purchase Return

Menu: Purchase · **Type:** entry

Goods sent back to the supplier (debit note), normally against a bill.

How to use

1. Choose the vendor, pull the bill with Bill No.
2. Adjust qty, give Party Bill No (credit note ref).
3. Save.

Effect

Where	What happens
Accounts	Dr vendor / Cr purchase return account / Cr VAT.
Stock	Goods go OUT (Negative Stock control applies).
VAT	Reduces input VAT.
Other modules	The bill's returned qty moves.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Invoice Type	Cash or credit, as Cash / Credit: decides whether the document leaves an outstanding against the party.
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.

Field	What it does / where its effect goes
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).

Accounts

Account Confirmation Letters

Menu: Accounts · **Type:** report

Balance confirmation letters for customers / suppliers - one per ledger, per billing name or per PAN - with statement, open bills, purchases / sales by nature (Inventory, Fixed Asset, Service) and a reply slip.

How to use

1. Choose party type, group by, as-on date (and from date for a statement).

3. Tick the parties and print.

Effect

Where	What happens
Accounts	None (read only).
Stock	None.
VAT	Shows VAT on purchases / sales with the party.

Bank Reconciliation

Menu: Accounts · **Type:** entry

Match the bank ledger with the bank statement (manual or by importing the statement).

How to use

1. Choose the bank ledger and period.
2. Import the statement (Excel / CSV) - auto-match by amount / cheque / date; confirm or match by hand.
3. BRS tab: balance per books, uncleared items, balance per bank.

Effect

Where	What happens
Accounts	No posting (clearing dates only). Bank charges / interest found here are entered through Cash / Bank or JV.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
As on	Report position at the end of this date (balances, stock, ageing).

Budgets

Menu: Accounts · **Type:** entry

Budgets by ledger, sub-ledger, cost center, unit or doc class and period; variance against actual.

How to use

1. Add budget lines per period.
2. Budget vs Actual shows actual, variance and %.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Bulk Cash Settlement

Menu: Accounts · **Type:** entry

Settle many cash-bill or party receipts at once (e.g. a salesman's day collection).

How to use

1. Choose parties / bills, amounts received.
2. Post.

Effect

Where	What happens
Accounts	Receipts: Dr cash / Cr each party.
Stock	None.
VAT	None.
Other modules	Bill-wise settlement of each bill.

Fields on this screen

Field	What it does / where its effect goes
Side	Sales side or purchase side.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.

From	First date of the report period.
To	Last date of the report period.
Mode	Cash, cheque, transfer, wallet ... printed and used by bank reconciliation.
Cheque No	Number of the post-dated cheque.
Cheque Date	Date on the cheque; the PDC dashboard shows due / overdue cheques by it.
Bank Name	Bank of the cheque.

Cash / Bank Entry

Menu: Accounts · **Type:** entry

Receipts and payments through cash or bank.

How to use

1. Receipt or Payment; cash or bank ledger; mode, cheque / txn no.
2. Lines: the party / ledger, amount, bill-wise settlement for parties.
3. One narration; Save.

Effect

Where	What happens
Accounts	Receipt: Dr cash / bank / Cr lines. Payment: Dr lines / Cr cash / bank.
Stock	None.
VAT	None.
Other modules	Bill-wise settlement of the party's bills; bank reconciliation; cash negative balance control.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Receipt / Payment	Receipt: money comes in (Dr cash / bank, Cr the lines). Payment: money goes out (Cr cash / bank, Dr the lines).
Cash / Bank	Whether the cash or a bank account is used.
Document No	Reference number (receipt book no, bank slip no).
Document Date	Date of the reference document / cheque.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Mode	Cash, cheque, transfer, wallet ... printed and used by bank reconciliation.
Cheque / Txn No	Cheque or transaction number - bank reconciliation matches it with the statement.
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).
Area	Area of the party / sale - area-wise reports and data access.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Cash/Bank Ledger	The cash-in-hand or bank ledger debited (receipt) or credited (payment).

Credit Note

Menu: Accounts · **Type:** entry

Customer-side adjustment without goods (discount allowed, rate difference).

How to use

1. Party, lines with ledgers and amounts.
2. Save.

Effect

Where	What happens
Accounts	Dr the lines / Cr customer.
Stock	None.
VAT	Lines to a VAT ledger reduce output VAT (Credit Note in the VAT register).
Other modules	Lines to a sales account appear in the Sales Account reconciliation.

Debit Note

Menu: Accounts · **Type:** entry

Supplier-side adjustment without goods (rate difference, claim, discount received).

How to use

1. Party, lines with ledgers and amounts (VAT line if any).
2. Save.

Effect

Where	What happens
Accounts	Dr supplier / Cr the lines.
Stock	None.
VAT	Lines to a VAT ledger reduce input VAT (Debit Note in the VAT register).
Other modules	Lines to a purchase account appear in the Purchase Account reconciliation.

Fixed Assets & Depreciation

Menu: Accounts · **Type:** entry

Fixed asset register, depreciation (SLM / WDV by block), asset sale / value reduction; schedule and detail reports.

How to use

1. Assets tab: add assets (cost, date, block / rate, ledger).
2. Depreciation tab: calculate for the period and post.
3. Sale / value reduce from the asset row.

Effect

Where	What happens
Accounts	Depreciation: Dr depreciation expense / Cr accumulated depreciation (or the asset). Sale: asset out, gain / loss.
Stock	None.
VAT	Asset purchase / sale VAT through the bill or JV.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
From	First date of the report period.
To	Last date of the report period.
Group by	How the rows are grouped / totalled.
Code	Code of the record - automatic and read-only.
Method	Stock valuation method: FIFO, moving average, weighted average ...

Interest on Overdue

Menu: Accounts · **Type:** entry

Interest on customers' overdue bills from the due date at the ledger's interest % p.a.

How to use

1. Choose the date and parties; check the calculated interest.
2. Post: a register row per party (posted once).

Effect

Where	What happens
Accounts	Dr customer / Cr interest income.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.

Journal Voucher

Menu: Accounts · **Type:** entry

Any accounting entry, and typed entries: taxable / non-taxable purchase or sales, asset purchase / sale, service purchase / sale, TDS on purchase / sales.

How to use

1. Choose the JV Type.
2. Purchase / sales types: party, bill no / date, taxable, non-taxable, VAT % - the lines (e.g. Purchase 2000 Dr, VAT 130 Dr, party 2130 Cr) are filled and can be changed.
3. TDS types: choose the party, tick its bills (newest first), give TDS % per bill - lines are made; a bill used once is not offered again.
4. Normal: enter Dr / Cr lines; picking a ledger on the next line puts the balancing amount.
5. One narration; Save.

Effect

Where	What happens
Accounts	Exactly the lines (Dr = Cr, enforced by the database).
Stock	None.
VAT	Purchase / sales / asset / service types go to the VAT register (JV Purchase / JV Sales).
Other modules	TDS types: TDS register and the record of bills already taken. JV Type "Small Balance Write-off (bulk)" opens its own screen.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
JV Type	Kind of journal: Normal, Taxable / non-taxable Purchase or Sales, Asset Purchase / Sale, Service Purchase / Sale, or TDS (on purchase / on sales). Purchase / sales types go to the VAT register; the lines are filled from the amounts.

Field	What it does / where its effect goes
Memo Only	A memo journal is recorded but not posted to the ledgers.
Ref Doc No	Reference document (supplier bill no for a purchase).
Ref Doc Date	Date of the reference document.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
PAN / VAT No	PAN of the party (VAT register).
Bill Date	Date of the supplier / customer bill.
Taxable Amount	Value on which VAT is charged (JV purchase / sales).
VAT %	VAT rate (13%); VAT amount = taxable x %.
VAT Amount	VAT of the journal - posted to the VAT A/c and to the VAT register.
Non-taxable Amount	VAT-exempt value (JV purchase / sales).
VAT A/c	VAT ledger the VAT goes to (defaults from System Control).
Bill Total	Taxable + non-taxable + VAT: the party amount.
TDS %	TDS rate. TDS amount = base x %. Sales: TDS the customer withholds (Dr TDS receivable, Cr customer). Purchase: TDS we withhold (Dr supplier, Cr TDS payable).
TDS Amount	TDS in rupees; typed or worked out from base x %.
TDS Ledger	TDS payable (purchase) or TDS receivable (sales) ledger; defaults from System Control.
TDS Sub-Ledger	Sub-ledger of the TDS ledger (e.g. TDS type / section).

PDC (Post-dated Cheque)

Menu: Accounts · **Type:** entry

Post-dated cheques received from customers or issued to suppliers.

How to use

1. Received / Issued, party, cheque no, cheque date, bank, amount.
2. On the cheque date: deposit / clear, bounce or return from the PDC dashboard.

Effect

Where	What happens
Accounts	Nothing until cleared; clearing posts a receipt / payment (bank Dr / Cr).
Stock	None.
VAT	None.
Other modules	Ledger Summary / Party Summary can show PDC separately; the PDC dashboard lists due cheques.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Received / Issued	Received: a post-dated cheque from a customer. Issued: our post-dated cheque to a supplier. Nothing posts to the ledger until the cheque is deposited / cleared.
Party	The customer / supplier ledger the document is with. Its balance moves with the document.
Bank Ledger	Bank the cheque is deposited to / paid from when it clears.
Cheque No	Number of the post-dated cheque.
Cheque Date	Date on the cheque; the PDC dashboard shows due / overdue cheques by it.
Amount	Amount of the line / cheque / document.

Field	What it does / where its effect goes
Bank Name	Bank of the cheque.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Ref Doc No	Reference document (supplier bill no for a purchase).
Ref Doc Date	Date of the reference document.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Small Balance Write-off (JV)

Menu: Accounts · **Type:** entry

Nil many small customer / supplier balances (e.g. up to Rs 50) in one Journal Voucher against discount.

How to use

1. Choose customers / suppliers / both, Dr / Cr / both balances, the "up to" amount (and "from"), the date, area / agent.
2. List balances; tick all or some.
3. Choose the discount allowed ledger (for Dr balances) and discount received ledger (for Cr balances); Post write-off JV.

Effect

Where	What happens
Accounts	One JV (type Small Balance Write-off): Dr balance - Cr party, Dr discount allowed; Cr balance - Dr party, Cr discount received.
Stock	None.
VAT	None.
Other modules	Each party's open bills are settled (bill-wise / ageing clear). Cancel the JV in Journal Voucher to undo the ledger entry and the settlements.

Fields on this screen

Field	What it does / where its effect goes
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Inventory

Barcode / Label Printing

Menu: Inventory · **Type:** tool

Print barcode labels for products / batches from purchases or a list.

How to use

1. Pick items (or a GRN / bill) and label count.
2. Choose a label format (designer) and print.

Effect

Where	What happens
Accounts	None.

Where	What happens
Stock	None.
VAT	None.

Production Reports

Menu: Inventory · **Type:** report

Production register, raw material consumption, BOM vs actual, cost trend.

How to use

1. Choose the view and period.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Group by	How the rows are grouped / totalled.

Re-order & Over-stock

Menu: Inventory · **Type:** report

Items below re-order level or above maximum.

How to use

1. Choose warehouse.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Stock Ageing & Expiry

Menu: Inventory · **Type:** report

Age of stock and batches near / past expiry.

How to use

1. Choose buckets and near-expiry days.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
As on	Report position at the end of this date (balances, stock, ageing).

Stock In / Out (Qty)

Menu: Inventory · **Type:** report

Quantity in and out per document.

How to use

1. Choose item and period.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Stock Movement

Menu: Inventory · **Type:** report

Opening, in and out by module, closing - qty and value (the same engine as the financial statements' closing stock).

How to use

1. Choose period, method, summary / detail.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Field	What it does / where its effect goes
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Stock Report

Menu: Inventory · **Type:** report

Stock quantity and value by item / warehouse / batch.

How to use

1. Choose the date, grouping and method.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
To	Last date of the report period.

Stock Transfer

Menu: Inventory · **Type:** entry

Move stock between warehouses or branches (direct, or two-step dispatch and receipt).

How to use

1. From / to warehouse (branch), transfer type.
2. Lines: item, qty, batch.
3. Two-step: post the dispatch; the other branch receives it on its date.

Effect

Where	What happens
Accounts	Only with "Post Stock Transfer to Accounts" on (branch stock ledgers / goods in transit).
Stock	Out of the sending warehouse, into the receiving one (company stock unchanged). Dispatched but not received = goods in transit.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Transfer Type	Direct (in and out together) or two-step branch transfer (dispatch, then receipt).
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
From Branch	Sending branch (branch transfer: goods in transit until received).
From Warehouse	Warehouse the goods leave (stock out).
To Branch	Receiving branch.
To Warehouse	Warehouse the goods reach (stock in).

Field	What it does / where its effect goes
Transport	Transporter (Transport Master).
Vehicle No	Vehicle carrying the goods - printed on the challan / transfer.
Driver Name	Driver of the vehicle.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Receiving Date	Date the goods were received at the other branch.

Stock Valuation

Menu: Inventory · **Type:** report

Closing stock value by FIFO, moving / weighted average, last purchase - batch / serial items by System Control's batch / serial costing (e.g. batch-wise: each batch at its own cost, landed cost of Purchase Additional included).

How to use

1. Choose the date and method; item + batch shows each batch's value. A tag on the item shows when batch / serial costing replaced the method.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Production

BOM Template

Menu: Production · **Type:** master

Bill of materials: raw materials (and by-products) for a given output qty.

How to use

1. Output product and qty.
2. Raw material lines with qty and unit.
3. Save; Production Order uses it.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Output Product	Finished / semi-finished product made. Stock in at the cost of the raw materials (less by-products) per base unit.
Output Relative Value	Share of cost for the main output when there are joint products (relative sales value).

Production Order

Menu: Production · **Type:** entry

Make a product from raw materials (from a BOM template or by hand), with by-products.

How to use

1. Output product, qty, unit, warehouse; BOM template fills the raw materials.
2. Adjust raw material qty; add by-products (value).
3. Post.

Effect

Where	What happens
Accounts	With WIP / production ledgers set: raw material consumption and output value.
Stock	Raw materials OUT of the source warehouse; output IN at (raw material cost - by-product value) per base unit; by-products IN at their value.
VAT	None.
Other modules	Production register, consumption, BOM vs actual and cost trend reports.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Output Product	Finished / semi-finished product made. Stock in at the cost of the raw materials (less by-products) per base unit.
Output Qty	Quantity produced.
Output Warehouse	Warehouse the output goes into.
Source Warehouse (Raw Material)	Warehouse the raw materials are taken from.
Output Batch No	Batch number of the production.
Output Relative Value	Share of cost for the main output when there are joint products (relative sales value).
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.

Masters

Billing Terms

Menu: Masters · **Type:** master

VAT, excise, discounts, freight and other charges used on sales / purchase documents - formula, sign (+ / -), basis, ledger, return ledger, sub-ledger, which entries they apply to.

How to use

1. New Billing Term: name, type (VAT / excise / discount / other), formula or rate, sign, basis (value / quantity), ledgers and sub-ledgers.
2. Term Used For: Transaction term (Sales / Purchase / Production Entry - on the bill itself) or Additional term (Purchase / Sales Additional - a later bill such as freight, customs, insurance).
3. Effect: Include In Costing (the amount goes into the cost of the goods / landed cost; off = an expense only), Include In Profitability (counted in the profitability reports) and TDS Applicable + TDS % (the TDS of a Purchase Additional entry is worked out by itself on these terms at this rate; empty % = System Control default).
4. Product Wise: entered per product (popup per product); otherwise bill-wise, divided over the products by the basis.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Term Mapping in System Control decides which term is VAT, discount 1-5, bill discount. VAT terms decide which VAT ledger gets the VAT.

Categories

Menu: Masters · **Type:** master

Product categories for analysis and targets.

How to use

1. Add categories.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Chart of Accounts (Ledger)

Menu: Masters · **Type:** master

Ledgers and account groups. The group decides where a ledger goes in the Balance Sheet / P&L, ratios and cash flow; the category type decides where it is offered (customer, supplier, cash, bank).

How to use

1. Ledger Accounts tab: New Ledger Account - name, group, category type, PAN, credit limit / days, bill-wise tracking, opening balance, area / route / agent, rate / discount category.
2. Account Groups tab: groups with their NFRS classification.
3. Ledger Categories tab: categories for grouping ledgers.

Effect

Where	What happens
Accounts	Opening balances are the start of the ledger (Ledger Opening Balance).
Stock	None.
VAT	None.

Where	What happens
Other modules	Every posting uses these ledgers; the ledger purpose check stops a P&L ledger being used where a Balance Sheet one is needed (and the reverse).

Fields on this screen

Field	What it does / where its effect goes
Code	Code of the record - automatic and read-only.
Account Name	Name of the ledger.
Short Name (Alias)	Short name / alias for quick search.
Category Type	Customer, supplier, both, cash, bank or others - decides where the ledger is offered (party pickers, cash / bank).
Account Group	Group the ledger belongs to - decides Balance Sheet / P&L place, Trial Balance and ratio / cash-flow category.
Tags	Free labels for searching and grouping.
Billing Name	Name printed on bills (if different from the ledger name); confirmation letters can group ledgers by it.
VAT/PAN Number	PAN / VAT number - printed on bills, VAT register, IRD, confirmation letters.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Credit Limit / Days	Maximum outstanding and credit days allowed - warned / blocked on sales per Credit Limit Control.
Interest % p.a.	Interest on overdue bills (Interest on Overdue posting).
Rate Category	Which selling rate (Sr1 - Sr5) this customer gets by default.
Discount Category	Default discount group of the customer.
Sub Ledger Mode	Whether this ledger uses sub-ledgers and which.
Credit Limit Control	None, warn or block when a sale takes the party over its credit limit.
Bill-wise Tracking	Keep the party's outstanding bill by bill (bill-wise ageing, settlement of payments against bills).
Opening Balance	Balance on the first day of the opening fiscal year (Dr / Cr).

Cost & Profit Centers

Menu: Masters · **Type:** master

Departments, projects, sites, sheds ... that postings are tagged with (P&L by cost center, budgets).

How to use

1. Cost Centers / Profit Centers tabs: add, set parent for a hierarchy.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Code	Code of the record - automatic and read-only.
Short Name (Alias)	Short name / alias for quick search.

Customs Offices (Bhansar)

Menu: Masters · **Type:** master

Customs offices picked on import Purchase Bills and on the Customs (Bhansar) tab of Purchase Additional. Nepal's customs offices are created with a code the first time the list opens.

How to use

1. Edit a code / name, add a new office, or deactivate one not used.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Ledger Opening Balance

Menu: Masters · **Type:** master

Opening balances of ledgers on the first day of the opening fiscal year (with bill-wise opening bills).

How to use

1. Enter Dr / Cr per ledger; party ledgers can have opening bills for bill-wise ageing.

Effect

Where	What happens
Accounts	Opening balances of the Trial Balance (Dr must equal Cr overall).
Stock	None.
VAT	None.

Offer Rate

Menu: Masters · **Type:** master

Time-bound offer (scheme) rates for products.

How to use

1. Product, rate, from / to dates.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From Date	First date of the report period.
To Date	Last date of the report period.

Product Groups & Companies

Menu: Masters · **Type:** master

Stock groups and product companies (brands).

How to use

1. Product Groups / Product Companies tabs.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Default Vendor	Usual supplier - used by purchase plans.

Product Master

Menu: Masters · **Type:** master

Products with units, rates (Sr1-Sr5, purchase), accounts (sales / purchase / return / non-saleable with sub-ledgers), terms, vendor and discount, stock settings (batch, serial, reorder), tracking and rack.

How to use

1. Basic Info: name, item type (trading, raw material, finished good, service, non-inventory, fixed asset), stock group, company.
2. Units & Rates: primary unit, other units / dual unit, rates.
3. Account Mapping: product accounts - they come first when posting.
4. Term Mapping, Vendor & Discount, Stock & Costing, Tracking, Rack Location.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Item type service / non-inventory / fixed asset: never moves stock. Product accounts override the document and System Control accounts.

Fields on this screen

Field	What it does / where its effect goes
Product Name	Name of the product.
Short Name	Short name / alias for quick search.
Code	Code of the record - automatic and read-only.
Item Type	Trading item, raw material, semi-finished, finished good, service, non-inventory or fixed asset. Service, non-inventory and fixed asset are not stock (no stock movement, not in closing stock).
Stock Group	Product group - group-wise stock and sales reports.
Company / Brand	Product company - company-wise sales, purchase and compulsory company rules.
HS Code	Harmonised System code (customs / VAT annex).
Tags	Free labels for searching and grouping.
Unit Mode	Single unit, multiple units with conversion, or dual unit (two quantities per line).
Primary Unit	Base unit of the product: stock is kept in it.
Default Vendor	Usual supplier - used by purchase plans.

Product Opening Stock

Menu: Masters · **Type:** master

Opening quantity and rate of products (and opening batches) at the start of the opening fiscal year.

How to use

1. Enter qty and rate per product / batch / warehouse.

Effect

Where	What happens
Accounts	None.
Stock	Opening stock of the stock engine (opening day = day before the fiscal year).
VAT	None.

Product Rate Change

Menu: Masters · **Type:** master

Change selling / purchase rates of many products at once (by % or amount).

How to use

1. Filter products, set the change, apply.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Product Units

Menu: Masters · **Type:** master

Units of measure (pcs, box, kg ...), simple or compound.

How to use

1. Add the unit name, symbol and type.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Rate Types, Rate Category, Discount Category

Menu: Masters · **Type:** master

Selling rate types Sr1-Sr5, rate categories (which rate a customer gets) and discount categories.

How to use

1. Rate Types: names of Sr1-Sr5.
2. Rate Category / Discount Category: add and assign to customers.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Remarks & Terms

Menu: Masters · **Type:** master

Saved remarks (narrations) and terms & conditions offered on documents.

How to use

1. Add remarks and terms; pick them on entries.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Route Plan & Mobile Login

Menu: Masters · **Type:** master

Which salesman visits which route on which date; mobile app logins.

How to use

1. Plan routes by date; give the salesman a user login.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Salesman / Agent	Salesman / agent of the sale: used for agent-wise sales, targets and commission.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
From	First date of the report period.
To	Last date of the report period.

Route Sequencing

Menu: Masters · **Type:** master

Customers on each route in visiting order.

How to use

1. Choose the route, order the customers.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Salesman / Agent

Menu: Masters · **Type:** master

Salesmen / agents with commission ledgers, mobile login and order settings.

How to use

1. Add the agent, commission expense and payable ledgers, linked user.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Short Name	Short name / alias for quick search.
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Sub Ledgers

Menu: Masters · **Type:** master

Sub-divisions of a ledger (branches of a customer, projects, TDS types ...). Postings carry them for sub-ledger statements and ageing.

How to use

1. Choose the main ledger, add sub-ledgers with code / name.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Short Name (Alias)	Short name / alias for quick search.
Code	Code of the record - automatic and read-only.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Bank Name	Bank of the cheque.

Transport Master

Menu: Masters · **Type:** master

Transporters and vehicles for challans.

How to use

1. Add transporter details.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Code	Code of the record - automatic and read-only.
Short Name (Alias)	Short name / alias for quick search.

Setup

Audit Log

Menu: Setup · **Type:** master

Every change with old and new values, user and time; audit coverage of tables.

How to use

1. Filter by table, user, date.

Effect

Where	What happens
Accounts	None - read only.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Branches & Warehouses

Menu: Setup · **Type:** master

Branches and warehouses (stock locations).

How to use

1. Branches / Warehouses tabs: add.

Effect

Where	What happens
Accounts	None.

Where	What happens
Stock	Stock is kept per warehouse.
VAT	None.

Business Units

Menu: Setup · **Type:** master

Divisions / brands / product lines postings are tagged with (P&L by unit).

How to use

1. Add units; optional hierarchy.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Code	Code of the record - automatic and read-only.
Short Name	Short name / alias for quick search.

Change My Password

Menu: Setup · **Type:** master

Change your own password.

How to use

1. Current password, new password twice.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Currencies

Menu: Setup · **Type:** master

Foreign currencies and exchange rates (Multi Currency).

How to use

1. Add currency, symbol and rate.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Code	Code of the record - automatic and read-only.

Data Access

Menu: Setup · **Type:** master

Which ledgers, products, companies, groups, categories and areas a user / group may see.

How to use

1. Choose the user / group and allowed items.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Document Designer

Menu: Setup · **Type:** master

Print layouts of bills, challans, vouchers, letters, labels.

How to use

1. Pick the document type, design fields / layout, set default.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Document Numbering

Menu: Setup · **Type:** master

Number series per document type, fiscal year, branch and category (prefix, digits, reset).

How to use

1. Add a series: voucher type, prefix, starting number, fiscal year part.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Doc Class Register shows gaps in a series.

Entry Field Control

Menu: Setup · **Type:** master

Per entry and user: which fields are visible, compulsory, read-only; which pull sources (Quotation / Order / Challan) are offered.

How to use

1. Choose the entry and user / group; set each field.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fiscal Years

Menu: Setup · **Type:** master

Fiscal years (Shrawan 1 - Ashadh end), the current year, and closing.

How to use

1. Add a year; set current.
2. Close: irreversible - nothing dated in a closed year can be posted, cancelled or changed any more.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Document numbering restarts per fiscal year.

Ledger Mapping

Menu: Setup · **Type:** master

Which ledgers do which job (sales, purchase, VAT, discount ...) per module.

How to use

1. Map each job to a ledger.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Messaging

Menu: Setup · **Type:** master

Email / SMS / WhatsApp / Viber templates, auto-send on posting, message log and bulk outstanding reminders.

How to use

1. Templates tab: text with placeholders.
2. Auto-send: which document sends which template.

3. Log / Reminders tabs.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

My Notification Settings

Menu: Setup · **Type:** master

Which in-app / email / SMS notifications you receive.

How to use

1. Tick the events and channels.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Security Groups

Menu: Setup · **Type:** master

Rights per module and action (view, create, edit, delete, cancel, approve).

How to use

1. Create a group and tick the rights.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

System Control

Menu: Setup · **Type:** master

Company-wide settings: Business Nature (trading, distribution, retail, manufacturing, service, automobile, construction, poultry), default ledgers (VAT, sales, purchase, TDS, cash, bank, GRN clearing, stock), term mapping, number formats, controls (negative stock, credit limit, back / post-date, IRD billing), features (multi warehouse, batch, serial, dual UOM, multi currency).

How to use

1. Change a setting and Save - it applies to new entries.

Effect

Where	What happens
Accounts	None.
Stock	None.

Where	What happens
VAT	None.
Other modules	Business Nature switches the industry menus. IRD Billing locks posted sales bills / returns to cancel-only.

User Defined Fields

Menu: Setup · **Type:** master

Extra fields on masters and documents (text, number, date, list).

How to use

1. Add the field and the screens it shows on.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Users

Menu: Setup · **Type:** master

Users, their security group, branch, department, rate change limits.

How to use

1. New User: email, name, security group, default branch, password.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
PAN Number	PAN / VAT number of the party printed on the bill and used in VAT registers / IRD. Can update the master.

Accounts Report

Ageing Report

Menu: Accounts Report · **Type:** report

Outstanding by age buckets (customer / supplier / delivery / GRN ageing).

How to use

1. Choose buckets, as-on date, basis.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.

Where	What happens
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
As on	Report position at the end of this date (balances, stock, ageing).
Method	Stock valuation method: FIFO, moving average, weighted average ...
Search	Find rows containing this text.
Show	Which rows to show (all / only differences / ...).

Bill-wise Ageing

Menu: Accounts Report · **Type:** report

Each open bill with its age and due status.

How to use

1. Choose party / as-on date.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
From Date	First date of the report period.
To Date	Last date of the report period.
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Control Reports

Menu: Accounts Report · **Type:** report

Day Book, Cash & Bank Book, master lists, credit exceeded, inactive customers, non-moving items, price list, cancelled / draft documents, master exceptions.

How to use

1. Choose the view from the menu (deep link) and the filters.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Search	Find rows containing this text.

Daily Register (one-page day sheet)

Menu: Accounts Report · **Type:** report

The counter's paper day sheet filled from posted vouchers: Sales (cash A / credit B), Purchase (C / D), Received / Bank withdraw (E / F), Expenses / Bank deposit (G / H), Return / Exchange (I / J), cash summary, sales / purchase to date, stock and profit.

How to use

1. Choose the date (or a date range), optionally a user or salesman / agent.
2. Cash summary: opening cash + A + E - C - G - refunds = expected closing; the books' closing and the difference (other cash entries such as JV).
3. Sales / purchase: opening from the fiscal year start to the day before, today, less return, to date; opening / closing stock, gross and net profit of the day.
4. Cash detail: count the notes (1000 ... 5, coin) - the difference with the books is shown; write the day's note. Count and note are kept on this computer per date.
5. With a user / agent filter only their vouchers are listed; opening / closing cash, stock and profit are left out. Print for signature.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
To	Last date of the report period.

Day Book (all-in-one)

Menu: Accounts Report · **Type:** report

Every voucher of a day or period with cash / credit split, cash & bank book, party-wise credit summary, and totals per agent and per user.

How to use

1. Choose the dates. No user / agent = the whole business (cash and bank with opening and closing).
2. User: vouchers entered by that user. Salesman / Agent: that agent's sales, returns, receipts (also cash / bank lines of the agent), PDC, credit notes.
3. Voucher type: any of Sales Bill, Sales Return, Sales Non-saleable Return, Sales Additional, Purchase Bill / Return / Additional, Cash / Bank Receipt, Payment, PDC Received / Issued, Journal, Credit / Debit Note. Party filter; drafts / pending on request.

4. Show / hide sections: summary, by voucher type, cash & bank, party-wise credit, by agent, by user, voucher list.
Print.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Dimension Reports

Menu: Accounts Report · **Type:** report

Ledger + sub-ledger balances, sub-ledger statement, P&L by cost center / unit / branch / doc class, cost center x ledger, monthly trend, doc class number gaps, missing dimensions.

How to use

1. Choose the preset from the menu and the period.
2. Ledger + Sub-ledger Balance: every sub-ledger with opening / debit / credit / closing and, after them, the "Ledger balance" row of the ledger (its master opening included).
3. Filters: Module (Sales, Purchase, Cash / Bank / PDC, Journal / Notes, Inventory / Production, Other), ledger, group, sub-ledger, cost center, unit, branch, document type, doc class, product company.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Financial Reports

Menu: Accounts Report · **Type:** report

Trial Balance, Profit & Loss, Balance Sheet, schedules / notes, ratios, cash flow, funds flow, group mapping, budget vs actual.

VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

LC / BG / PDC Dashboard

Menu: Accounts Report · **Type:** report

LCs, bank guarantees and PDCs with expiry and actions.

How to use

1. Act on due items.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
As on	Report position at the end of this date (balances, stock, ageing).

Field	What it does / where its effect goes
Status	Document status: draft, posted, cancelled ...
Search	Find rows containing this text.

Ledger Report

Menu: Accounts Report · **Type:** report

Ledger statement of one ledger / sub-ledger: detail, summary (PDC separate) or monthly.

How to use

1. Choose ledger, period, mode.
2. Click a line to open the document.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Net Position of Funds

Menu: Accounts Report · **Type:** report

Cash, bank, receivables, payables, PDC and unused limits - net funds available.

How to use

1. Choose the as-on date.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
As on	Report position at the end of this date (balances, stock, ageing).

Outstanding Report

Menu: Accounts Report · **Type:** report

Receivable / payable outstanding by party (bill-wise when tracked).

How to use

1. Choose side, as-on date.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

PDC Dashboard

Menu: Accounts Report · **Type:** report

Post-dated cheques due, overdue, cleared, bounced; deposit / clear from here.

How to use

1. Choose received / issued and the period.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
As on	Report position at the end of this date (balances, stock, ageing).
From	First date of the report period.
To	Last date of the report period.
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Bank Ledger	Bank the cheque is deposited to / paid from when it clears.

Party Summary

Menu: Accounts Report · **Type:** report

Opening, debit, credit, closing of all parties; PDC can be shown separately.

How to use

1. Choose party type and period.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Reconciliation (VAT / Sales / Purchase / Stock / TDS)

Menu: Accounts Report · **Type:** report

Do the registers and the books agree? Document by document: VAT register vs VAT ledgers, sales register (incl. JV sales, credit notes) vs sales accounts, purchase register (incl. additional bills, JV purchases, debit notes) vs purchase accounts, purchase value vs value put into stock, TDS vs TDS ledgers.

How to use

1. Overview: Tallied / Not tallied for each check.
2. Open a tab; click Differences / Only in register / Only in books to see why.
3. Add or remove accounts compared with the chips.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Show	Which rows to show (all / only differences / ...).

Universal Register

Menu: Accounts Report · **Type:** report

Every document of every module with status, party, amount.

How to use

1. Filter by type, date, status.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

VAT Reports

Menu: Accounts Report · **Type:** report

Sales / Purchase VAT register (bills, returns, notes, additional bills, taxable JVs), monthly summary, Annex 13, VAT return, VAT ledger, TDS report.

How to use

1. Register: use the book buttons (Sales Book / Purchase Book) or tick document types; view bill / party / item / month / summary.
2. VAT Return: output VAT, input VAT, payable or carry forward, with a GL check.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Customer / Supplier	Limit the report to one party.
Documents	Which document types are included. The book buttons tick a whole book at once (bills + JVs + additional bills).
View	Layout of the report.
Side	Sales side or purchase side.

Tips

- Export in English or Nepali headers with BS dates.

Sales/Purchase

Consignment Cost / Sales

Menu: Sales/Purchase · **Type:** report

Cost and sales of purchase bills with their additional bills; the first view is Consignment Costing (date-wise).

How to use

1. Choose the dates (and supplier / product).
2. Consignment Costing view: per bill a header row, its products and a "Bill No Total" row - Qty, Rate, Basic, Add / Less (bill terms), Net Basic, one column per additional term (costing), one per non-additional term (VAT claimable, TDS, not in costing), Total Additional, Total Non-Additional, Net Amount and Cost Rate (landed / qty).
3. Product-wise additional terms go wholly to their product; bill-wise terms are divided by the term's basis (value net of VAT / qty / equal).
4. Other views: bill-wise, product-wise, ledger summary and mismatches. Export CSV.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.

Where	What happens
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

GRN Outstanding

Menu: Sales/Purchase · **Type:** report

GRN lines not yet billed.

How to use

1. Filter by vendor and dates.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
From Date	First date of the report period.
To Date	Last date of the report period.

Loading Sheet

Menu: Sales/Purchase · **Type:** report

Items to load per vehicle / route from goods delivery and / or sales bills, with the bill summary on the same sheet.

How to use

1. Choose dates, sources, customer / salesman / area / route / vehicle filters.
2. Qty views: By UOM mode - fixed dual "5 Crt 2 Pcs · Total 62 Pcs", flexible "5 Crt = 10 Pcs"; base unit; as entered; split into units; one unit.
3. The Total row gives the qty as entered per unit and the total in base unit (per base unit when items differ), for fixed and flexible items alike.
4. Print sections: Items, Bill Summary (bill no, customer, route, amounts, received / sign) and Bill x Item - print them together on one sheet.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.
Vehicle No	Vehicle carrying the goods - printed on the challan / transfer.

Monthly Analysis

Menu: Sales/Purchase · **Type:** report

Month-wise sales / purchase by item or party.

How to use

1. Choose the year and grouping.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Profitability

Menu: Sales/Purchase · **Type:** report

Sales value, cost of goods sold (stock engine), gross profit by item / party / bill.

How to use

1. Choose the period and valuation method.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From	First date of the report period.
To	Last date of the report period.

Purchase Register (all)

Menu: Sales/Purchase · **Type:** report

Lines of requisitions, quotations, orders, GRNs and bills with converted and outstanding qty / amount.

How to use

1. Choose the module and filters; Outstanding only.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
View	Layout of the report.
From Date	First date of the report period.
To Date	Last date of the report period.
Doc No	Number of the document. Given automatically on save from Document Numbering (series per fiscal year).
Vendor	The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master.
Status	Document status: draft, posted, cancelled ...
Agent	Salesman / agent: agent-wise reports, targets and commission.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.

Rate & Discount History

Menu: Sales/Purchase · **Type:** report

Rate and discount changes per product.

How to use

1. Choose the product.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes

Work Dashboard

Menu: Office · **Type:** report

Tasks and darta / chalani at a glance.

How to use

1. Filter by your tasks / all.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Tools

Document Print Status

Menu: Tools · **Type:** report

Which documents were printed and how many times; print many at once.

How to use

1. Filter documents, tick and print.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
From Date	First date of the report period.
To Date	Last date of the report period.
Search	Find rows containing this text.

Help Center

Menu: Tools · **Type:** master

All manuals: complete user manual, one per business nature, IRD billing architecture and user manual; for super admin also the developer guide, the logic audit and the PDF of every menu screen.

How to use

1. Read in the browser or download the PDF.
2. Every screen also has ? Help on its toolbar (Shift+F1) and a tooltip on each field caption.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Import from another Firm

Menu: Tools · **Type:** master

Copy masters and transactions from another firm (company) you can open into this one.

How to use

1. Choose the firm to copy from and Show what can be imported: per master list the count there, already here (same code) and new; per document type the count, posted and imported before.
2. Tick masters (the masters they need come along - a ledger's group, a product's unit and group) and / or transactions (their ledgers, sub-ledgers, products and billing terms come along). Existing masters: keep, or update from the other firm. Opening balances / stock only when ticked.
3. Transactions come in as DRAFTS with this firm's masters; a number already used here gets "-<firm code>". Post imported drafts posts them in date order (ledger / stock by this firm's rules).
4. A record already imported is never imported twice; masters are matched again by code.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
To	Last date of the report period.

Report Center

Menu: Tools · **Type:** report

Every report in one place with search.

How to use

1. Search or open a group.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Salesman Mobile App

Menu: Tools · **Type:** master

Mobile screen for salesmen: the routes planned for them on the day, customers in visiting sequence, orders, cash receipts, sales returns, stock, visits.

How to use

1. Today: only the route(s) planned for this salesman on this date (a date-range plan shows on each date of the range). Open a route: its customers in sequence, with search.
2. Per customer: Order, Receipt (cash / cheque / online), No order (reason), Details.
3. Return tab: choose area and route (any), the customer, items and qty, reason - saved as a pending Sales Return.
4. Entries tab: own orders, and receipts / returns with their approval state.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Orders reach Sales Order with source "mobile". Receipts and returns are drafts tagged with the salesman as agent; the office posts them in Mobile Approvals. Settings per salesman in Route Plan > Mobile: allow receipts / returns, mobile cash ledger, off-route.

Poultry

Broiler Batches

Menu: Poultry · **Type:** master

Shed-wise broiler batches: placement (chicks), daily log (feed / medicine / vaccine used, mortality, culls, weight), lifting (birds sold), close; KPIs and profitability.

How to use

1. New Batch: shed, date, chicks placed (stock out of chick stock).
2. Daily log: consumption posts stock adjustments with the batch cost center.
3. Lifting: makes a draft Sales Bill.
4. Close the batch.

Effect

Where	What happens
Accounts	Through the normal documents (stock adjustments, sales bills, expenses with the batch cost center).
Stock	Chicks, feed, medicine, vaccine go out through stock adjustments with the batch / shed cost center.
VAT	None.
Other modules	Livability, FCR, EPEF and profit per batch.

Hatchery

Menu: Poultry · **Type:** master

Egg setting, candling, hatch (A / B grade chicks), fertility, hatchability and chick cost; chicks can go to own sheds.

How to use

1. Set eggs, record candling and hatch results.

Effect

Where	What happens
Accounts	None.
Stock	Eggs out, chicks in through stock adjustments.
VAT	None.

Poultry & Hatchery Setup

Menu: Poultry · **Type:** master

Sheds / hatchers, poultry items (chick, feed, medicine ...), breed standards, ledgers and warehouse.

How to use

1. Fill each tab once.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.

Poultry Dashboard

Menu: Poultry · **Type:** report

Running batches, mortality, FCR, livability, hatchery figures.

How to use
