

Production Order

Menu: Production · **Type:** entry

Make a product from raw materials (from a BOM template or by hand), with by-products.

How to use

1. Output product, qty, unit, warehouse; BOM template fills the raw materials.
2. Adjust raw material qty; add by-products (value).
3. Post.

Effect

Where	What happens
Accounts	With WIP / production ledgers set: raw material consumption and output value.
Stock	Raw materials OUT of the source warehouse; output IN at (raw material cost - by-product value) per base unit; by-products IN at their value.
VAT	None.
Other modules	Production register, consumption, BOM vs actual and cost trend reports.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Output Product	Finished / semi-finished product made. Stock in at the cost of the raw materials (less by-products) per base unit.
Output Qty	Quantity produced.
Output Warehouse	Warehouse the output goes into.
Source Warehouse (Raw Material)	Warehouse the raw materials are taken from.
Output Batch No	Batch number of the production.
Output Relative Value	Share of cost for the main output when there are joint products (relative sales value).
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Remarks	Remarks printed on the document; pick a saved remark (Remarks master) or type your own.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
