

Purchase Return

Menu: Purchase · **Type:** entry

Goods sent back to the supplier (debit note), normally against a bill.

How to use

1. Choose the vendor, pull the bill with Bill No.
2. Adjust qty, give Party Bill No (credit note ref).
3. Save.

Effect

Where	What happens
Accounts	Dr vendor / Cr purchase return account / Cr VAT.
Stock	Goods go OUT (Negative Stock control applies).
VAT	Reduces input VAT.
Other modules	The bill's returned qty moves.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Invoice Type	Cash or credit, as Cash / Credit: decides whether the document leaves an outstanding against the party.
Vendor Sub-Ledger	Sub-ledger under the vendor ledger. The party posting carries it (sub-ledger statement / ageing).
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Agent	Salesman / agent: agent-wise reports, targets and commission.
Currency	Currency of the document (Multi Currency on). Amounts are entered in it; the exchange rate converts them to NPR for accounts.
Goods Account	Purchase / goods account for this document when the product has none. A fixed asset or stock ledger can be chosen for capital purchases.
Goods Sub-Ledger	Sub-ledger of the goods account.
Rate Type	Which selling rate (Sr1 - Sr5) the lines use. Defaults from the customer's rate category; changing it re-rates the lines after asking.
Party Bill No	The supplier's own bill number (VAT invoice no). It goes to the purchase VAT register; the same number cannot be entered twice for one supplier.
Party Bill Date	Date on the supplier's bill - VAT register and Annex 13.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Priority	Urgency of the document (normal / high / urgent) - for follow-up lists only.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.

Field	What it does / where its effect goes
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).
