

Import from another Firm

Menu: Tools · **Type:** master

Copy masters and transactions from another firm (company) you can open into this one.

How to use

1. Choose the firm to copy from and Show what can be imported: per master list the count there, already here (same code) and new; per document type the count, posted and imported before.
2. Tick masters (the masters they need come along - a ledger's group, a product's unit and group) and / or transactions (their ledgers, sub-ledgers, products and billing terms come along). Existing masters: keep, or update from the other firm. Opening balances / stock only when ticked.
3. Transactions come in as DRAFTS with this firm's masters; a number already used here gets "-<firm code>". Post imported drafts posts them in date order (ledger / stock by this firm's rules).
4. A record already imported is never imported twice; masters are matched again by code.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
