

## GRN Outstanding

**Menu:** Sales/Purchase · **Type:** report

GRN lines not yet billed.

### How to use

1. Filter by vendor and dates.

### Effect

| Where    | What happens      |
|----------|-------------------|
| Accounts | None - read only. |
| Stock    | None - read only. |
| VAT      | None.             |

### Fields on this screen

| Field     | What it does / where its effect goes                                                                                                                                  |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vendor    | The supplier (ledger in Sundry Creditors). Credited with the bill total (debited on a return / debit note). PAN, address and credit days come from the vendor master. |
| From Date | First date of the report period.                                                                                                                                      |
| To Date   | Last date of the report period.                                                                                                                                       |

### Tips

- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns,  $\Sigma$  Values; Columns = Field Selector), totals per column ( $\Sigma$  Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
