

Re-order & Over-stock

Menu: Inventory · **Type:** report

Items below re-order level or above maximum.

How to use

1. Choose warehouse.

Effect

Where	What happens
Accounts	None - read only.
Stock	None - read only.
VAT	None.

Fields on this screen

Field	What it does / where its effect goes
Product Company	Company / brand of the goods on this document. With "Product Company Compulsory" in System Control, only that company's products can be picked and the party posting is split by company (company-wise ledger / ageing).

Tips

- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns, Σ Values; Columns = Field Selector), totals per column (Σ Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
