Tips

- Export in English or Nepali headers with BS dates.
- Grid / Report above the table: Grid filters (picks one or many values, AutoFilter, conditions), groups (drag a header to Rows - sub-totals), pivots (drag to Columns, Σ Values; Columns = Field Selector), totals per column (Σ Footer), chart / pivot chart, data bars, added columns (running balance, % of total, formula), CSV and print. Views keep it all. Only dates stay up top: product / party / area ... boxes fold under More filters - filter them in the grid, where each item / party brings its Product Group, Company, Category, Area, Route, Agent ... as fields.
