

PDC (Post-dated Cheque)

Menu: Accounts · **Type:** entry

Post-dated cheques received from customers or issued to suppliers.

How to use

1. Received / Issued, party, cheque no, cheque date, bank, amount.
2. On the cheque date: deposit / clear, bounce or return from the PDC dashboard.

Effect

Where	What happens
Accounts	Nothing until cleared; clearing posts a receipt / payment (bank Dr / Cr).
Stock	None.
VAT	None.
Other modules	Ledger Summary / Party Summary can show PDC separately; the PDC dashboard lists due cheques.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Received / Issued	Received: a post-dated cheque from a customer. Issued: our post-dated cheque to a supplier. Nothing posts to the ledger until the cheque is deposited / cleared.
Party	The customer / supplier ledger the document is with. Its balance moves with the document.
Bank Ledger	Bank the cheque is deposited to / paid from when it clears.
Cheque No	Number of the post-dated cheque.
Cheque Date	Date on the cheque; the PDC dashboard shows due / overdue cheques by it.
Amount	Amount of the line / cheque / document.
Bank Name	Bank of the cheque.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Ref Doc No	Reference document (supplier bill no for a purchase).
Ref Doc Date	Date of the reference document.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
