

Sales Non-saleable Return

Menu: Sales · **Type:** entry

Damaged / expired goods returned by a customer that cannot be sold again.

How to use

1. Pull the bill with Bill No., enter the damaged qty and reason.
2. Save.

Effect

Where	What happens
Accounts	Dr Non-saleable return account / Cr customer.
Stock	Kept apart as non-saleable stock (not in saleable stock).
VAT	As per the return.
Other modules	Counts against the bill's returned qty together with normal returns.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Settlement Type	How the return is settled: against the bill (adjusts that bill's outstanding) or on account.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.

Field	What it does / where its effect goes
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).
