

Sales Return

Menu: Sales · **Type:** entry

Goods coming back from a customer (credit note), normally against a bill.

How to use

1. Choose the customer and pull the bill with Bill No. - only the qty not yet returned is offered.
2. Give the return reason and settlement type; adjust qty.
3. Save.

Effect

Where	What happens
Accounts	Dr Sales Return account (product return account > sales account) / Dr VAT / Cr Customer.
Stock	Goods come back IN at their cost (the cost that batch / serial went out at, else the current average) - never at the selling rate.
VAT	Reduces output VAT (credit note in the VAT register; sent to CBMS as a bill return).
Other modules	The bill's returned qty moves; bill-wise settlement against the bill.

Fields on this screen

Field	What it does / where its effect goes
Date	Date of the document. Accounts, stock, VAT month and ageing all use this date. Type it (AD or BS - switch with the AD/BS button) or pick it. A date in a closed fiscal year cannot be posted.
Customer	The customer (ledger in Sundry Debtors). Debited with the bill total (credited on a return). PAN, address, credit limit, rate category, agent and area come from the customer master.
Warehouse	Warehouse the stock goes out of / comes into (only with Multi Warehouse on). A line can have its own warehouse.
Sales Account	Sales (income) account for this document when the product has none. Product account > this account > System Control Sales Account Mapping.
Sales Sub-Ledger	Sub-ledger of the sales account for this document.
Return Reason	Why the goods came back: printed on the credit note, sent to IRD for sales returns.
Settlement Type	How the return is settled: against the bill (adjusts that bill's outstanding) or on account.
Salesman/Agent	Salesman / agent: agent-wise reports, targets and commission.
Customer Sub-Ledger	Sub-ledger (e.g. branch or project of the customer) under the customer ledger. The party posting carries it, so sub-ledger statements and ageing show it.
Area	Area of the party / sale - area-wise reports and data access.
Route	Delivery / sales route - route-wise sales, loading sheet and route plan.
Cost Center	Cost center (department, project, site, shed ...) every posting of this document carries: P&L by cost center, budgets.
Unit	Business unit (division / brand) every posting carries: P&L by unit, budgets.
Narration	One line description printed on the voucher and shown in the ledger. Pick a saved remark or type.
Bill No.	Pull from a posted bill of this party (for a return): only the qty not yet returned is offered.
Item Code	Product code or barcode - type or scan; Enter moves on. F1 shows this customer's / supplier's rate history.
Item Name	The product. Its units, rates, accounts, VAT, batch / serial and item type come from the Product Master.
Qty	Quantity in the selected unit. Stock moves in the product's base unit (converted automatically).

Field	What it does / where its effect goes
Free Qty	Free (scheme) quantity: moves stock, no value.
UOM	Unit of the line (box, pcs, kg ...). Conversion to the base unit comes from Product Units / the product.
Alt Qty	Quantity in the second unit of a dual-unit product (e.g. pcs with cartons).
Rate	Rate per unit (per the rate basis). Sales: from the rate type / rate category / offer rate; purchase: last purchase rate.
Rate Basis	Whether the rate is per the primary or the secondary unit of a dual-unit product.
Gross	Qty x rate before discounts and terms.
Add / Less	Product-wise charges and discounts of the line (from its billing terms popup when Item Charges is on); the popup total shows here.
Net Amount	Gross +/- the line terms: the value of the line.
Batch	Batch / lot number (Batch System on). Stock and batch-wise costing follow it.
Serial No	Serial number of the piece (Serial Number on) - vehicles, electronics.
Exp Date	Expiry date of the batch - near-expiry alerts and stock ageing.
Ref No (source doc)	The document this line was pulled from (quotation / order / challan / GRN / bill).
