

Product Master

Menu: Masters · **Type:** master

Products with units, rates (Sr1-Sr5, purchase), accounts (sales / purchase / return / non-saleable with sub-ledgers), terms, vendor and discount, stock settings (batch, serial, reorder), tracking and rack.

How to use

1. Basic Info: name, item type (trading, raw material, finished good, service, non-inventory, fixed asset), stock group, company.
2. Units & Rates: primary unit, other units / dual unit, rates.
3. Account Mapping: product accounts - they come first when posting.
4. Term Mapping, Vendor & Discount, Stock & Costing, Tracking, Rack Location.

Effect

Where	What happens
Accounts	None.
Stock	None.
VAT	None.
Other modules	Item type service / non-inventory / fixed asset: never moves stock. Product accounts override the document and System Control accounts.

Fields on this screen

Field	What it does / where its effect goes
Product Name	Name of the product.
Short Name	Short name / alias for quick search.
Code	Code of the record - automatic and read-only.
Item Type	Trading item, raw material, semi-finished, finished good, service, non-inventory or fixed asset. Service, non-inventory and fixed asset are not stock (no stock movement, not in closing stock).
Stock Group	Product group - group-wise stock and sales reports.
Company / Brand	Product company - company-wise sales, purchase and compulsory company rules.
HS Code	Harmonised System code (customs / VAT annex).
Tags	Free labels for searching and grouping.
Unit Mode	Single unit, multiple units with conversion, or dual unit (two quantities per line).
Primary Unit	Base unit of the product: stock is kept in it.
Default Vendor	Usual supplier - used by purchase plans.
